1 *“Social media is indiscriminately ruthless and knows no boundaries, even in*  
2 *remote places such as Indian Country.”*

3 *Promote Hope for the Future: Addressing Suicide in*  
4 *Indigenous Youth*, Native News (Sept. 15, 2023)

#### 4 I. INTRODUCTION

5 1. Native American tribes have persisted and thrived despite centuries of systemic  
6 oppression and violence by an alien dominant culture that seeks to assimilate and destroy their  
7 institutions, families, and youth.

8 2. For centuries, members of tribes were subjected to land dispossession, forced  
9 displacement, and brutal massacres. The destruction of their homes and way of life, coupled with  
10 exposure to new diseases brought by European settlers, decimated populations and disrupted the  
11 social fabric of hundreds of years of American Indian culture.<sup>1</sup>

12 3. The most insidious and brutal cruelties inflicted on Indigenous communities were  
13 against their children, who were forcibly removed from their families and placed in boarding  
14 schools to assimilate them into Euro-American culture.<sup>2</sup> These institutions often subjected children  
15 to physical, emotional, and sexual abuse, while viciously punishing them for speaking their  
16 languages or practicing their traditions.<sup>3</sup> The impact of these historical exposures is long-lasting  
17 and intergenerational. The result of the traumas inflicted on generations of Native children is the

1 persistent poverty, substance abuse disorders, and socioeconomic disparity endemic to modern  
2 Native communities.<sup>4</sup>

3 4. Now, yet another crisis is causing significant injury to tribal youth.<sup>5</sup> Youth suicide  
4 rates of Indigenous peoples far exceed the national average.<sup>6</sup>

5 5. Youth suicide has profound and multifaceted impacts on tribal populations,  
6 affecting individuals, families, and entire communities. In closely connected tribal communities,  
7 the loss of a single young person can deeply affect the entire population, causing grief and long-  
8 term trauma.

9 6. Beyond the emotional toll, youth suicide poses a significant challenge to the long-  
10 term vitality of tribal communities. Young people play a crucial role in preserving cultural  
11 knowledge and traditions, and their loss disrupts the transmission of practices that are central to  
12 tribal identity. Furthermore, the premature death of these individuals diminishes the workforce and  
13 undermines the development of future leaders, creating lasting impacts on the stability and growth  
14 of tribal nations.

15 7. Social media products have been a significant contributor to the current mental  
16 health crisis facing young Indigenous peoples worldwide.<sup>7</sup> Defendants, who are all so-called

1 “social-media companies,” recognize that Native Americans are already vulnerable populations—  
2 especially teens and adolescents, and have designed products to exploit and profit from those  
3 vulnerabilities.

4 8. The effects of social media addiction have been felt significantly among the youth  
5 of The Choctaw Nation of Oklahoma (referred to as “Choctaw Nation”, “Plaintiff” or “the  
6 Nation”), whose chronically underfunded health and welfare programs have been pushed to their  
7 breaking points by this new crisis.

8 9. The Nation brings this lawsuit after numerous shocking revelations by  
9 whistleblowers within the social media industry: that social media companies designed their  
10 products to be addictive, and that the products have contributed to a growing mental health crisis  
11 among children and adolescents.<sup>8</sup>

12 10. For several years—and, in the instances of some of the Defendants, over decades—  
13 Defendants have pursued an aggressive growth strategy that put profits above all else—prioritizing  
14 and maximizing user engagement in order to sell targeted advertisements at the expense of keeping  
15 children safe.<sup>9</sup>

16 11. Defendants designed their products to be addictive—preying on the developing  
17 brains of children. Defendants also knew that their products caused mental health problems in  
18 children and girls in particular.<sup>10</sup>

19 \_\_\_\_\_  
20 [162353](#) (“Indigenous communities are facing a crisis in mental health, with harmful content on  
social media a major contributor to increased Indigenous suicide rates”).

27 <https://www.washingtonpost.com/education/2023/03/30/social-media-girls-teens-depression-tiktok/>; Lesley McClurg, *After compulsively watching YouTube, teenage girl lands in rehab for*  
28

1 12. Each of the Defendants knowingly developed social media products that were  
2 addictive<sup>11</sup> so that they could maximize profits through advertising dollars by increasing user  
3 “engagement.”<sup>12</sup>

4 13. Defendants have systematically received complaints about children and teenagers  
5 becoming addicted to, and suffering from numerous mental health issues because of, their  
6 products; however, they have undertaken minimal—if any—action that would address the  
7 problems that their Social Media Products have caused.

8 14. It is widely recognized that social media use negatively impacts youth mental  
9 health, a fact supported by extensive scientific research.<sup>13</sup> Unfortunately, this understanding comes  
10 too late for the Choctaw Nation, which has already diverted significant limited resources both to  
11 the immediate and long-term consequences of suicide and the teen mental health crisis.

12 15. Because Defendants designed products for the purpose of being addictive, placing  
13 profits above the welfare of children and adolescents, the Choctaw Nation should be compensated  
14 for their losses—proportionate to the significant resources needed to mitigate and address the  
15 growing crisis and the continuous danger posed by the Defendants’ products.

1 **II. JURISDICTION AND VENUE**

2 16. This Court has general personal jurisdiction over Defendants because they are  
3 incorporated or have their principal places of business in California, or they have contacts with  
4 California that are so continuous and systematic that they are essentially at home in this State.  
5 Meta, Google, and ByteDance—as they are described below—maintain their principal places of  
6 business in this District. Snap and TikTok maintain their headquarters in this State. All Defendants  
7 regularly conduct and solicit business in California, provide their platforms to persons and tribal  
8 members from this State, and derive substantial revenue from their business as described herein.  
9 All Defendants affirmatively and extensively engage with a significant percentage of Choctaw  
10 Nation individuals who live in this State through messages, notifications, recommendations, and  
11 other communications.

12 17. This Court has subject matter jurisdiction over the claims in this Complaint  
13 pursuant to 28 U.S.C. §1331 because this case arises, in part, under federal laws of the United  
14 States. Specifically, Plaintiff asserts a claim under the Racketeer Influenced and Corrupt  
15 Organizations Act, 18 U.S.C. §§1961, *et seq.* This Court has supplemental jurisdiction over  
16 Plaintiff’s common law claims pursuant to 28 U.S.C. §1367(a), as all claims alleged herein form  
17 part of the same case or controversy.

18 18. Venue is proper in this District because at least some of the Defendants reside in  
19 this District, their principal places of business are in this District, or a substantial part of the events  
20 or omissions giving rise to the claims at issue in this Complaint arose in this District.

21 **III. PARTIES**

22 **A. Plaintiff**

23 19. The **Choctaw Nation of Oklahoma** is a federally recognized Tribe that maintains  
24 a government-to-government relationship with the United States and whose governing body is  
25 recognized by the Secretary of the Interior.<sup>14</sup> The Nation exercises sovereign powers of self-

26 \_\_\_\_\_  
27 <sup>14</sup> See Indian Entities Recognized by and Eligible to Receive Services from the United States  
28 Bureau of Indian Affairs, 86 Fed. Reg. 7554, 7557 (Jan. 29, 2021),  
<https://www.federalregister.gov/documents/2022/01/28/2022-01789/indian-entities-recognized->

1 governance and jurisdiction over its reservation in ten and a half counties in the State of Oklahoma:  
2 Hughes, Pittsburg, Haskell, Coal, Latimer, Le Flore, Atoka, Pushmataha, Bryan, Choctaw, and  
3 McCurtain.

4 20. The Nation has over 225,000 members and is the third largest tribe in the United  
5 States.

6 21. The Nation's principal business address is 1802 Chukka Hina, Durant, OK 74701.

7 22. The Nation is governed by its own Constitution, laws, and governmental  
8 institutions, including a duly elected Tribal Council. The Tribal Council is responsible for setting  
9 policy and deciding on behalf of the Nation and its members. The Tribal Council oversees the  
10 operation of the Nation's Tribal government and assures quality programs and services are  
11 provided to its members. The Nation provides its members with a wide range of government  
12 services and programs, including public safety and police services; education; a fire department; a  
13 tribal court; a health clinic and various treatment programs; community and family services,  
14 including vocational rehabilitation, disabilities services, a domestic violence/sexual assault shelter,  
15 and family-centered advocacy; various social services, including adult and child protective  
16 services, child support enforcement services, foster care and adoption, Indian child welfare  
17 services, a group home, and preventive services; economic development; planning and  
18 infrastructure; and other programs and services.

19 23. The Choctaw Nation provides programs that specifically support the health and  
20 development of the Nation's youth. A key component of this effort is Choctaw Nation Behavioral  
21 Health Services, which operates under the Choctaw Nation Health Administration. The healthcare  
22 network includes one flagship hospital, nine medical clinics, and behavioral health staff located at  
23 seven of those clinics and the hospital across the Reservation. The Nation provides mental health  
24 care to Choctaw Nation tribal members, as well as all members of federally recognized tribes

25  
26 [by-and-eligible-to-receive-services-from-the-united-states-bureau-of](#). There are a total of 347  
27 federally recognized Indian Tribes within the contiguous 48 states and 227 federally recognized  
28 Tribal entities within the state of Alaska that comprise the 574 federally recognized Indian Tribes  
of the United States. The term "Indian" is not included throughout the remainder of this Complaint.

1 located on the Reservation. The Nation offers several different ways to help with mental health,  
2 including counseling for both individuals and families, case management services, substance abuse  
3 counseling, child or partner abuse counseling, psychiatric medication (evaluation and  
4 management), crisis intervention and suicide prevention. Choctaw Nation Behavioral Health  
5 Outpatient Clinics are located throughout the Choctaw Nation reservation at Talihina, McAlester,  
6 Stigler, Poteau, Atoka, Hugo, Idabel, and Durant.

7 24. The Choctaw Nation launched suicide prevention efforts in 2010 with a methamphetamine  
8 and suicide prevention initiative. Recognizing the need to address the growing youth mental health  
9 crisis, the Nation secured a grant through the U.S. Department of Health and Human Services  
10 Substance Abuse and Mental Health Services Administration (SAHMSA) and launched a program  
11 called “Tomorrow’s Hope” to address suicide and depression in Choctaw youth, ages 10-24. Funds  
12 are used to train service providers and community members in PHQ9, a multipurpose instrument  
13 for screening, diagnosing, monitoring, and measuring the severity of depression. The trainings are  
14 held across the Nation’s Behavioral Health Services network, law enforcement and schools.

15 25. The Nation participates in a 988 Lifeline program, part of a national network of local crisis  
16 centers that offer free, confidential emotional support to individuals in suicidal crisis or emotional  
17 distress. Through a partnership with the agency overseeing Oklahoma’s 988 program, when a tribal  
18 member in Oklahoma calls 988 and identifies as Choctaw, the Nation follows up to ensure  
19 members receive the care they need.

20 26. The Nation also developed the “Zero Suicide” advisory team, which meets regularly to  
21 enact changes within the healthcare system to address depression and suicide prevention. As part  
22 of the Zero Suicide program, the Nation provides mental health awareness training for every new  
23 hire.

24 27. In response to the growing youth mental health crisis, the Nation opened the Children’s  
25 Urgent Recovery Center in October 2024—the only facility of its kind serving youth in southern  
26 Oklahoma.

27  
28

1           **B. Defendants**

2           28. Defendants are collectively referred to as “Defendants” or “Social Media  
3 Defendants” throughout this Complaint.

4                   **1. Meta Defendants**

5           29. Defendant **Meta Platforms, Inc. f/k/a Facebook, Inc.** (“Meta Platforms”) is a  
6 Delaware corporation and multinational technology conglomerate. Its principal place of business  
7 is in Menlo Park, California.

8           30. Meta Platforms’ subsidiaries include, but are not limited to, the entities identified  
9 in this section, as well as a dozen others whose identity or involvement is presently unclear.

10           31. Defendant **Facebook Payments Inc.** (“Facebook 1”) is a wholly owned subsidiary  
11 of Meta Platforms that was incorporated in Florida on December 10, 2010. Facebook 1 manages,  
12 secures, and processes payments made through Meta Platforms, among other activities. Its  
13 principal place of business is in Menlo Park, California.

14           32. Defendant **Siculus, Inc.** (“Siculus”) is a wholly owned subsidiary of Meta  
15 Platforms that was incorporated in Delaware on October 19, 2011. Siculus constructs data facilities  
16 to support Meta Platforms’ products. Its principal place of business is in Menlo Park, California.

17           33. Defendant **Facebook Operations, LLC** (“Facebook 2”) is a wholly owned  
18 subsidiary of Meta Platforms that was incorporated in Delaware on January 8, 2012. Facebook 2  
19 is likely a managing entity for Meta Platforms’ other subsidiaries. Meta Platforms is the sole  
20 member of this LLC, whose principal place of business is in Menlo Park, California.

21           34. Defendant **Instagram, LLC** (“Instagram”) launched a product called Instagram in  
22 October 2010. On or around April 7, 2012, Meta Platforms purchased Instagram, LLC for over  
23 one billion dollars and reincorporated the company in Delaware. Meta Platforms is the sole  
24 member of this LLC, whose principal place of business is in Menlo Park, California.

25           35. Meta Platforms, Instagram, Siculus, Facebook 1, and Facebook 2 are referred to  
26 jointly as “Meta” or “Facebook.”

27           36. Meta owns, operates, controls, produces, designs, maintains, manages, develops,  
28 tests, labels, markets, advertises, promotes, supplies, and distributes digital products available

1 through mobile- and web-based applications (“apps”), including Instagram and Facebook  
2 (together, “Meta products”); Messenger; and Messenger Kids. Meta’s apps and devices are widely  
3 distributed to consumers throughout the United States.

4 **2. Snap**

5 37. Defendant **Snap, Inc.** (“Snap”) is a Delaware corporation with its principal place  
6 of business is in Santa Monica, California.

7 38. Snap owns, operates, controls, produces, designs, maintains, manages, develops,  
8 tests, labels, markets, advertises, promotes, supplies, and distributes the app Snapchat. Snapchat is  
9 widely available to consumers throughout the United States.

10 **3. TikTok**

11 39. Defendant **TikTok Inc. f/k/a Musical.ly, Inc.** is a California corporation with its  
12 principal place of business in Culver City, California. TikTok Inc. designs, owns, and operates the  
13 TikTok social media platform, an application that is widely marketed by TikTok Inc. and available  
14 to minors throughout the United States. TikTok is known as a video-sharing application, where  
15 users can create, share, and view short video clips.

16 40. Defendant **ByteDance Inc.** is a Delaware corporation with its principal place of  
17 business and headquarters in Mountain View, California. ByteDance Inc. design, owns, and/or  
18 operates TikTok, and designs, develops, owns, operates, and/or markets the TikTok social media  
19 platform, an application that is widely marketed by TikTok and available to users throughout the  
20 United States.

21 41. Defendant **ByteDance Ltd.** is a multinational internet technology holding company  
22 and is the parent company of TikTok Inc., TikTok Ltd., and ByteDance Inc. ByteDance Ltd. is  
23 headquartered in Beijing, China, and registered in the Cayman Islands. ByteDance Ltd. designs,  
24 owns, and/or operates TikTok, and designs, owns, and/or operates the TikTok social media  
25 platform, an application that is widely marketed by TikTok and available to minors throughout the  
26 United States. ByteDance Ltd. also maintains offices in the United States, Singapore, India, and  
27 the United Kingdom, among other locations.

28

1 42. ByteDance Ltd. wholly owns its subsidiary Defendant **ByteDance Inc.**, a Delaware  
2 corporation whose principal place of business is in Mountain View, California.

3 43. ByteDance Ltd. wholly owns its subsidiary Defendant **TikTok Ltd.**, a Cayman  
4 Island corporation with its principal place of business in Shanghai, China.

5 44. TikTok Ltd. wholly owns its subsidiary Defendant **TikTok LLC** which is, and at  
6 all relevant times was, a Delaware limited liability company. TikTok LLC wholly owns subsidiary  
7 Defendant TikTok, Inc. f/k/a Musical.ly, Inc.

8 45. Defendant **TikTok U.S. Data Security Inc.** (“USDS”) is a Delaware corporation  
9 with its principal place of business and headquarters in Culver City, California. Defendant **TikTok**  
10 **Inc.** wholly owns subsidiary Defendant USDS.

11 46. Defendants TikTok Ltd.; TikTok LLC; TikTok Inc.; ByteDance Ltd.; ByteDance  
12 Inc.; and USDS are referred to jointly as “ByteDance” or “TikTok.”<sup>15</sup>

#### 13 4. YouTube

14 47. Defendant **Google LLC** (“Google”) is a limited liability company organized under  
15 the laws of the state of Delaware, and its principal place of business is in Mountain View,  
16 California. Google is a wholly owned subsidiary of XXVI Holdings Inc., and the managing  
17 member of YouTube, LLC. Google transacts or has transacted business in this District and  
18 throughout the United States. At all times material, acting alone or in concert with others, Google  
19 has advertised, marketed, and distributed its YouTube video sharing platform to minors throughout  
20 the United States. At all times material to this Complaint, acting alone or in concert with YouTube,  
21 LLC, Google formulated, directed, controlled, had the authority to control, or participated in the  
22 acts and practices set forth in this Complaint. Further, upon information and belief, Google  
23 oversees the operations of its various platforms and subsidiaries including YouTube, LLC.

24 48. Defendant **YouTube, LLC** (“YouTube”) is a limited liability company organized  
25 under the laws of the state of Delaware, and its principal place of business is in San Bruno,  
26 California. YouTube is a wholly-owned subsidiary of Google. YouTube transacts or has transacted

27  
28 <sup>15</sup> Corporate Structure, ByteDance (Feb. 2, 2023), <https://www.ByteDance.com/en/>.

1 business in this District and throughout the United States. At all times material to this Complaint,  
2 acting alone or in concert with defendant Google, YouTube has designed, developed, advertised,  
3 marketed, operated, and distributed its YouTube social media platform to minors throughout the  
4 United States. At all times material to this Complaint, acting alone or in concert with Google,  
5 YouTube formulated, directed, controlled, had the authority to control, or participated in the acts  
6 and practices set forth in this Complaint.

7 49. On October 2, 2015, Google reorganized and became a wholly owned subsidiary of  
8 a new holding company, **Alphabet Inc.**, a Delaware corporation with its principal place of business  
9 in Mountain View, California.

10 50. Google LLC and YouTube, LLC (together, “Google” or “YouTube”) are alter egos  
11 of one another: together and in concert they own, operate, control, produce, design, maintain,  
12 manage, develop, test, label, market, advertise, promote, supply, and distribute the app YouTube.

#### 13 **IV. GENERAL FACTUAL ALLEGATIONS**

##### 14 **A. Social Media Defendants Have Intentionally Designed Social Media 15 Applications and Platforms to Be Addictive to Maximize Profit**

16 51. Defendants’ social media products (referred to as “Social Media Platforms”) are  
17 meticulously designed to be addictive, leveraging physiological and psychological principles, and  
18 behavioral science to keep users engaged. One of the primary strategies employed is the use of  
19 variable rewards, akin to slot machines. Users are provided with unpredictable rewards—such as  
20 likes, comments, or new content—that trigger dopamine releases in the brain, fostering a habit-  
21 forming loop. This intermittent reinforcement keeps users coming back for more, as they seek the  
22 pleasure derived from these unpredictable stimuli.<sup>16</sup>

23 52. Another aspect of social media’s addictiveness is the infinite scroll feature.  
24 Platforms like Facebook and Instagram allow users to endlessly scroll through content, creating a  
25 sense of boundlessness. This design choice exploits the brain's tendency to seek novelty, making

28 Harvard Med. School (May 1, 2018), <https://sitn.hms.harvard.edu/flash/2018/dopamine-smartphones-battle-time>.

1 it hard for users to find a natural stopping point. Without clear boundaries, users often lose track  
2 of time, spending far longer on these platforms than they originally intended.<sup>17</sup>

3 53. Notifications also play a crucial role in enhancing the addictive nature of Social  
4 Media Platforms. These alerts, which are often personalized, are designed to re-engage users by  
5 drawing their attention back to the app based upon the user’s “fear of missing out” on additional  
6 opportunities to be connected. This fear further exacerbates this cycle, as users feel compelled to  
7 stay updated and connected.<sup>18</sup>

8 54. Moreover, Social Media Platforms employ sophisticated algorithms that curate  
9 content to match users’ interests and behaviors. These algorithms analyze user data to deliver a  
10 personalized feed, ensuring that the content is always relevant and engaging. By continuously  
11 adapting to user preferences, Defendants’ Social Media Platforms ensure that there is always  
12 something appealing to keep users hooked. This personalization not only maximizes engagement  
13 but also deepens the user’s attachment to the platform, making it an integral part of their daily  
14 routine.<sup>19</sup>

15 55. According to Tristen Harris, former Google Design Ethicist, social media product  
16 designers maximize capitalizing on user attention by “play[ing] your psychological vulnerabilities  
17 (consciously and unconsciously) against you in the race to grab your attention.”<sup>20</sup>

1 56. Algorithms play a vital role in the race for attention using machine learning and  
2 data science to generate content based on the likelihood that the user will want to see the suggested  
3 content.<sup>21</sup>

4 57. Social media apps are designed to be addictive. Based upon their design,  
5 interactions with the apps can release large amounts of dopamine into a user's brain's reward  
6 pathway—identical to highly addictive substances.<sup>22</sup>

7 58. Addiction to social media is by design: the more an individual interacts with an  
8 app, the more money the social media company makes. This is because each interaction with a  
9 user allows more opportunities to monetize that user's interactions to sell advertising access.<sup>23</sup>

10 59. The addictive nature of social media usage is further increased when users engage  
11 in mental rituals like following certain accounts or posting frequently to stay in touch with  
12 friends.<sup>24</sup> Social media increasingly replaces physical human interactions, leading to feelings of  
13 isolation and loneliness.<sup>25</sup>

1 60. Young people are more susceptible to social media addiction than older adults, and  
2 young people aged 16 to 25 have the highest rates of social media-related mental illness.<sup>26</sup>

3 61. Social Media Defendants have known for years that their products—not only  
4 designed to be addictive—are addictive.

5 62. For example, Sandy Parakilas, a former Facebook employee who began working at  
6 the company in 2011, has likened “[s]ocial media [to be] very similar to a slot machine.”<sup>27</sup> He  
7 explained that, when trying to stop using Facebook, “[i]t literally felt like I was quitting  
8 cigarettes.”<sup>28</sup>

9 63. Mr. Parakilas has confirmed that others at Facebook had also recognized the risk of  
10 addiction. “There was definitely an awareness of the fact that the product was habit-forming and  
11 addictive. . . . You have a business model designed to engage you and get you to basically suck as  
12 much time out of your life as possible and then selling that attention to advertisers.”<sup>29</sup>

13 64. Former Facebook executive Chamath Palihapitiya also noted that “[t]he short-term  
14 dopamine-driven feedback loops that we have created are destroying how society works. . . . It  
15 literally is a point now where I think we have created tools that are ripping apart the social fabric  
16 of how society works. That is truly where we are. I would encourage all of you, as the future  
17 leaders of the world to really internalize how important this is. If you feed the beast, that beast will  
18 destroy you.”<sup>30</sup>

designed-addiction](https://www.psychologytoday.com/us/blog/boundless/201801/technology-designed-addiction).

1           65. Each Social Media Defendant has designed, engineered, marketed, and operated its  
2 products to maximize the number of youth users who engage and use their respective products  
3 compulsively.

4           66. This exploitation of young users, which includes the young children, adolescents,  
5 and teenagers of the Choctaw Nation, has become central to Defendants' profitability. Like the  
6 cigarette industry a generation earlier, Defendants understand that a child user today becomes an  
7 adult user tomorrow.<sup>31</sup> Indeed, Defendants' insatiable appetite for growth has created a need for  
8 younger and younger users. Defendants' wrongfully acquired knowledge of their childhood  
9 userbase has allowed them to develop product designs to target elementary school-age children,  
10 who are uniquely vulnerable.

11           67. Like Joe Camel of old cigarette advertisements, Defendants' recent attempts to  
12 capture pre-adolescent audiences include "kid versions" of apps that are "designed to fuel [kids']  
13 interest in the grown-up version."<sup>32</sup>

14           68. While the passage of laws like the Children's Online Privacy Protection Act  
15 ("COPPA") in 1999<sup>33</sup> require social media companies to obtain age verification before collecting  
16 certain information about children,<sup>34</sup> for a significant period of time relevant to this Complaint,  
17 Social Media Defendants did not conduct proper age verification or authentication. Instead, each

23 <sup>33</sup> See 15 U.S.C. §§6501-6506.

24 <sup>34</sup> The FTC recently clarified that acceptable methods for obtaining verifiable parent consent  
25 include: (a) providing a form for parents to sign and return; (b) requiring the use of a credit/card  
26 online payment that provides notification of each transaction; (c) connecting to trained personnel  
27 via video conference; (d) calling a staffed toll-free number; (e) asking knowledge-based questions;  
28 or (f) verifying a photo-ID from the parent compared to a second photo using facial recognition  
technology. Federal Trade Commission, *Complying with COPPA: Frequently Asked Questions*,  
July 2020, <https://www.ftc.gov/business-guidance/resources/complying-coppa-frequently-asked-questions>.

1 Defendant left it to users to self-report their age. Newer types of age verification adopted by the  
2 Defendants are easy for adolescents to bypass. This unenforceable and facially inadequate system  
3 allows children under thirteen to easily create accounts on Defendants' apps.

4 69. This is particularly egregious for two reasons. *First*, Defendants have long been on  
5 notice of the problem. For instance, in May 2011, Consumer Reports reported the “troubling news”  
6 that 7.5 million children under the age of thirteen were on Facebook.<sup>35</sup> *Second*, given that  
7 Defendants have developed and utilized age-estimation algorithms for the purpose of selling user  
8 data and targeted advertisements, Defendants could readily use these algorithms to prevent  
9 children under thirteen from accessing their products, but choose not to do so.

10 70. Defendants have done this because children are financially lucrative, particularly  
11 when they are addicted to Defendants' Social Media Platforms.

12 71. This is because, the more time children spend on Social Media Platforms, the more  
13 money Defendants make off of advertising.<sup>36</sup>

14 **B. Social Media Has Widespread, Dire, and Often Tragic Effects on the**  
15 **Mental Health of Teenagers, Adolescents, and Children—a Vulnerable**  
16 **Population Uniquely Susceptible to Harm from Defendants' Addictive**  
17 **Applications and Platforms**

18 72. Young people are not only Defendants' most lucrative market but are also those  
19 most vulnerable to harm resulting from Defendants' products.

reveal that, across six major social media platforms, the 2022 annual advertising revenue from  
youth users ages 0-17 years is nearly \$11 billion. Approximately 30-40% of advertising revenue  
generated from three social media platforms is attributable to young people.”).

1 73. Adolescents, on average, report spending between five to seven hours per day on  
2 social media, and half of those believe that they spent “too much time” on social media.<sup>37</sup>

3 74. Social media companies, including the Social Media Defendants, know all of this.

4 [P]sychologist Nicholas Kardaras explains that the people behind Facebook  
5 and Instagram not only designed their platforms to be wildly addictive but  
6 have kept them that way even amid mounting evidence that social media  
7 overuse has a horrible effect on people’s mental and physical well-being.  
(The same is true for Twitter, YouTube, TikTok, and most other social  
8 media.)<sup>38</sup>

9 75. Facebook’s founding president, Sean Parker, said publicly that the company set out  
10 to consume as much user time as possible. He claimed it was “exploiting a vulnerability in human  
11 psychology.” “The inventors,” he admitted, “understood this consciously and we did it anyway.”<sup>39</sup>

12 76. Perhaps most tellingly about the negative effects that social media has on children,  
13 some significant tech moguls do not let their children use social media.<sup>40</sup>

14 77. Young people are particularly more susceptible to social media addiction than older  
15 adults, and young people aged 16 to 25 have the highest rates of social media-related mental  
16 illness.<sup>41</sup>

17 78. Chris Said, who has a Ph.D. in psychology from Princeton University and who has  
18 worked at both Facebook and Twitter, notes that, “[s]ocial media was like a nuclear bomb on teen  
19

<sup>41</sup> Michael Simon, *The Alarming Reality of Social Media Addiction Statistics in 2023*,  
TechReport (May 16, 2023), <https://techreport.com/statistics/social-media-addiction-statistics/>.

1 social life. . . . I don't think there's anything in recent memory, or even distant history, that has  
2 changed the way teens socialize as much as social media.”<sup>42</sup>

3 79. Social media addiction can cause a number of negative problems in young users.

4 80. Teens, adolescents, and children are frequent and heavy users of social media, with  
5 studies showing that over 90% of this population regularly engages with Social Media Platforms.<sup>43</sup>  
6 These platforms have become integral to their social lives and identity formation, making them  
7 uniquely susceptible to the content and mechanisms that drive engagement.

8 81. Social Media Platforms are designed using sophisticated algorithms and  
9 psychological triggers that exploit reward systems in the brain, leading to compulsive usage.  
10 Features like infinite scrolling, notifications, and “likes” create a cycle of dependency, which  
11 negatively impacts mental health, particularly in young users whose brains are still developing.

12 82. Adolescents and children are particularly prone to social comparison. Social media  
13 magnifies these tendencies by constantly exposing them to highly curated, unrealistic portrayals  
14 of others' lives. This fosters feelings of inadequacy, low self-esteem, and dissatisfaction with one's  
15 own life.<sup>44</sup>

16 83. Defendants' Social Media Platforms provide new arenas for bullying, with  
17 cyberbullying becoming a widespread issue that disproportionately affects young users. The

28

1 anonymity and distance provided by online platforms inflame the cruelty of harassment, leading  
2 to increased rates of depression, anxiety, and suicide among teenagers.<sup>45</sup>

3 84. The compulsive use of social media often leads to disrupted sleep patterns, as  
4 teenagers and children use these platforms late into the night. Sleep deprivation is closely linked  
5 to mood disorders, irritability, and cognitive impairments, further exacerbating mental health  
6 issues.<sup>46</sup>

7 85. Numerous studies have drawn a direct correlation between heavy social media use  
8 and heightened levels of anxiety and depression, particularly among adolescents. The constant  
9 connectivity and pressure to maintain an online persona contribute to feelings of stress, isolation,  
10 and hopelessness.<sup>47</sup>

11 86. The “fear of missing out” is a documented psychological effect of social media  
12 usage, wherein adolescents experience anxiety over being excluded from events, experiences, or  
13 conversations. This fear fuels compulsive checking of social media feeds, increasing stress levels  
14 and exacerbating feelings of isolation.<sup>48</sup>

15 87. Social Media Platforms often promote unrealistic beauty standards through edited,  
16 filtered images and influencer culture. This has a profound effect on teenagers and children,  
17  
18

[social-media](https://www.psychologytoday.com/us/blog/the-asymmetric-brain/202106/fomo-and-social-media).

1 especially young girls, leading to body dysmorphia, eating disorders, and a distorted sense of self-  
2 worth.<sup>49</sup>

3 88. Social media use has been linked to increased rates of self-harm and suicidal  
4 ideation among teenagers. The exposure to harmful content, such as glorification of self-harm,  
5 suicide pacts, or dangerous online challenges, can push vulnerable adolescents toward destructive  
6 behaviors.<sup>50</sup>

7 89. Social Media Platforms' algorithms often push users toward increasingly extreme  
8 content based on their viewing history. Adolescents, who are still forming their worldviews, are  
9 particularly vulnerable to online echo chambers that normalize harmful ideologies, conspiracy  
10 theories, and even radicalization.<sup>51</sup>

11 90. The rapid adoption of social media by adolescents and children has outpaced  
12 parents' ability to effectively supervise their online activities. Social Media Platforms are designed  
13 to evade parental controls, exposing young users to harmful content without adequate oversight.<sup>52</sup>

14 91. Social media use triggers dopamine release in the brain, much like addictive  
15 substances. Adolescents, with their developing brains, are more susceptible to dopamine-driven  
16

28 [media-help.html](https://www.nytimes.com/2021/09/21/well/family/teens-social-media-help.html) (“kids 12 and under can easily evade any age-related restrictions on social media  
platforms by lying about their birth year”).

1 behavior, leading to a heightened risk of social media addiction and the corresponding negative  
2 impacts on mental health.<sup>53</sup>

3 92. Social media often amplifies the stigma and isolation surrounding mental health  
4 issues. Adolescents may seek validation through likes, comments, and shares, but negative or  
5 insufficient responses can worsen feelings of rejection and alienation, compounding mental health  
6 struggles.<sup>54</sup>

7 93. Despite being more “connected” than ever through social media, teenagers and  
8 children are reporting higher levels of loneliness and social isolation. The superficial nature of  
9 online interactions often fails to meet the deep, emotional connections that are crucial for  
10 adolescent mental development.<sup>55</sup>

11 94. The addictive nature of Defendants’ Social Media Platforms distracts teenagers  
12 from their academic responsibilities, leading to declining grades and school performance. This, in  
13 turn, increases stress and anxiety levels, contributing to a negative feedback loop that impacts both  
14 their education and mental well-being.<sup>56</sup>

15 95. Social Media Platforms often glorify risky or harmful behaviors, such as substance  
16 abuse, dangerous stunts, or hypersexuality. Adolescents and children, who are still developing

[low-math-reading-science-performance](https://www.pbs.org/newshour/education/social-media-use-linked-low-math-reading-science-performance).

1 judgment and decision-making skills, are more likely than adults to imitate these behaviors,  
2 increasing the likelihood of harm.<sup>57</sup>

3 96. Social Media Platforms are largely unregulated, particularly in how they affect  
4 vulnerable populations like children and adolescents. The absence of meaningful safeguards or  
5 effective age restrictions allows young users unfettered access to content that can negatively  
6 impact their mental health.<sup>58</sup>

7 97. Children and adolescents are frequently exposed to violent, sexual, or otherwise  
8 inappropriate content on Social Media Platforms, often without adequate warning or filtering. This  
9 can lead to trauma, desensitization to violence, and confusion about sexual relationships and  
10 identity.<sup>59</sup>

11 98. Adolescents are particularly susceptible to peer pressure, which is amplified  
12 through social media use. Groupthink, viral challenges, and the desire to conform to online trends  
13 can lead teenagers into dangerous situations or unhealthy behaviors that they might not otherwise  
14 engage in.<sup>60</sup>

15 99. The consequences of social media use in young people can be dire, extreme,  
16 widespread, and cause significant damage to youth development.

1           **C. Young Users of Defendants’ Addictive Social Media Applications and**  
2           **Platforms Are Especially Vulnerable Because Their Prefrontal**  
3           **Cortexes (Which Affects Judgment) Are Not Fully Developed**

4           100. The addictive nature of Defendants’ applications and platforms is especially  
5           damaging for teens and young people. MRI brain studies show that students who use social media  
6           more frequently had increased activation points of their brain, “possibly making them more prone  
7           to peer feedback and hypersensitivity and possibly leading to changes in impulse control and  
8           regulation, according to ABC News chief medical correspondent Dr. Jennifer Ashton.”<sup>61</sup>

9           101. *Social media usage can hinder healthy development of the prefrontal cortex.*  
10          Social Media Platforms often promote a culture of comparison, where teenagers constantly  
11          compare themselves to their peers in terms of appearance, achievements, and social status. This  
12          continuous exposure to idealized and curated representations of others’ lives can lead to feelings  
13          of inadequacy, low self-esteem, and increased social anxiety. The prefrontal cortex, involved in  
14          self-reflection and emotional regulation, can be impacted by the constant pressure and negative  
15          emotions resulting from social comparison, potentially hindering healthy brain development.<sup>62</sup>

16          102. Because social media companies push their defective products on developing  
17          brains, the effects are catastrophic. Studies have shown that teens who spend more than three hours  
18          per day using social media are at a heightened risk for mental health problems, poor mental health,  
19

        *Comm’ns* (Feb. 21, 2018), <https://www.nature.com/articles/s41467-018-03126-x>.

1 and poor well-being.<sup>63</sup> Extensive research on the quantity and quality of social media use has  
2 shown an association between social media use and depression in adolescents.<sup>64</sup>

3 103. Heavy use of Social Media Platforms is also associated with feelings of social  
4 isolation. People who report spending the most time on social media—more than two hours per  
5 day—had twice the odds of perceived social isolation than those who said they spent a half hour  
6 per day or less on those sites.<sup>65</sup>

7 104. ***Social media usage leads to impulsive decision-making and risk-taking behavior.***  
8 The prefrontal cortex is responsible for regulating impulsive behaviors and assessing risks. Social  
9 Media Platforms often encourage instant gratification, impulsive reactions, and seeking novelty.  
10 This can contribute to a greater inclination towards impulsive decision-making and risk-taking  
11 behavior, as teenagers may engage in potentially harmful activities driven by the desire for social  
12 validation or the need to conform to online trends. Such behavior can negatively impact the  
13 development of the frontal cortex, which is responsible for evaluating consequences and exercising  
14 self-control.<sup>66</sup>

15 105. ***Social media usage's dopamine rush impacts the ventral striatum.*** Between the  
16 ages of 10 and 12, changes in the brain make social rewards—compliments on clothing or positive  
17 feedback—start to feel more satisfying. Specifically, receptors for oxytocin and dopamine multiply

1 in a part of the brain called the ventral striatum, making preteens extra sensitive to attention and  
2 admiration from others.<sup>67</sup>

3 106. Social Media Platforms provide a mechanism to experience these “social rewards,”  
4 giving the ventral striatum “a dopamine and oxytocin rush whenever we experience social  
5 rewards.”<sup>68</sup> And, “[r]ight next door to the ventral striatum lies the ventral pallidum, a region of  
6 the brain key for motivating action. These structures, which lie beneath the more recently evolved  
7 cortex, are older parts of the brain that drive instinctual behaviors.”<sup>69</sup> Teens continue to seek out  
8 approval and acceptance via these “social rewards” on social media and become isolated and feel  
9 lonelier if and when they do not receive them.<sup>70</sup>

10 107. ***Social media usage reduces face-to-face interactions, impeding the development***  
11 ***of social skills in youth users.*** Excessive reliance on Social Media Platforms for social interactions  
12 can reduce face-to-face interactions, which are crucial for the development of social skills,  
13 cognitive development, and emotional intelligence. The prefrontal cortex is involved in  
14 understanding and navigating social dynamics, including interpreting facial expressions, body  
15 language, and non-verbal cues. Reduced face-to-face interactions may limit opportunities for  
16 teenagers to develop and refine these social skills, potentially affecting the maturation of the frontal  
17 cortex, and possibly leading to the development of narcissistic tendencies.<sup>71</sup>

1           **D. Millions of Children, Adolescents, and Teenagers Are Addicted to**  
 2           **Defendants’ Social Media Products and Use Them Compulsively**

3           108. Defendants have been staggeringly successful in their efforts to attract young users  
 4 to their apps. In 2021, 32% of 7- to 9-year-olds,<sup>72</sup> 49% of 10- to 12-year-olds,<sup>73</sup> and 90% of 13-  
 5 to 17-year-olds in the United States used social media.<sup>74</sup> A majority of U.S. teens use Instagram,  
 6 TikTok, Snapchat, and/or YouTube. 32% say they “wouldn’t want to live without” YouTube, while  
 7 20% said the same about Snapchat, and 13% said the same about both TikTok and Instagram.

8           109. Social media use among tribal youth is compulsive. The 2020 Native Youth Health  
 9 Tech Survey determined that 65.3% of tribal youth (15-24) are on social media 3 to 7 hours per  
 10 day, “with 86.0% reporting their primary activity on social media as scrolling, followed by  
 11 watching videos (75.1%).”<sup>75</sup> The same survey found that “the most popular daily technology  
 12 use among [Native American Indian or Alaska Native] youth involved browsing Instagram  
 13 (74.0%), sending/receiving snap messages via Snapchat (60.0%), using TikTok (50.4%), and  
 14 watching videos on YouTube (48.4%).”<sup>76</sup>

1 **V. SOCIAL MEDIA DEFENDANTS AND THEIR CORRESPONDING**  
2 **PLATFORMS HAVE EACH CONTRIBUTED TO THE MENTAL**  
3 **HEALTH CRISIS DEVASTATING INDIGENOUS YOUTH**

4 **A. Meta’s Social Media Products Are Designed to Be Addictive and Meta**  
5 **Profits from that Addiction**

6 110. Meta operates and designs two social media platforms at issue in this Complaint:  
7 Facebook and Instagram. Meta’s products are broadly popular and are among the most-used social  
8 media applications in the world. Facebook has nearly 3 billion monthly active users, and Instagram  
9 has over a billion monthly active users.<sup>77</sup>

10 111. Meta’s platforms are mass-marketed products<sup>78</sup> which are consumed by the general  
11 public, including minors. The products work by collecting user data in exchange for providing a  
12 service.

13 112. Instagram’s evolution has focused on increasing user engagement in order to drive  
14 profits. The introduction of video sharing in 2013 allowed users to share dynamic content,<sup>79</sup> while  
15 the introduction of Instagram Stories in 2016 facilitated real-time sharing that disappeared after 24  
16 hours, challenging the dominance of Snapchat in ephemeral content.<sup>80</sup>

17

21 <sup>78</sup> See Meta Platforms Annual Report 2022 at 3 (Feb. 3, 2022),  
22 <https://annualreport.stocklight.com/nasdaq/meta/22586105.pdf> (“The term ‘Family’ refers to our  
23 Facebook, Instagram, Messenger, and WhatsApp products. For references to accessing Meta's  
24 products on the ‘web’ or via a ‘website,’ such terms refer to accessing such products on personal  
computers. For references to accessing Meta's products on ‘mobile,’ such term refers to accessing  
such products via a mobile application or via a mobile-optimized version of our websites such as  
m.facebook.com, whether on a mobile phone or tablet.”)

25 <sup>79</sup> Colleen Taylor, *Instagram Launches 15-Second Video Sharing Feature, With 13 Filters*  
26 *and Editing*, Tech Crunch (June 20, 2013), [https://techcrunch.com/2013/06/20/facebook-](https://techcrunch.com/2013/06/20/facebook-instagram-video/)  
[instagram-video/](https://techcrunch.com/2013/06/20/facebook-instagram-video/).

27 <sup>80</sup> *Introducing Instagram Stories*, Instagram (Aug. 2, 2016),  
28 <https://about.instagram.com/blog/announcements/introducing-instagram-stories>.

1 113. Instagram is intentionally addictive and was designed and manufactured to addict  
2 its users to drive profits.<sup>81</sup>

3 114. Meta, the company behind Facebook and Instagram, has deliberately incorporated  
4 detrimental elements into their platforms that encourage addictive behavior among adolescents.

5 These defects include, but are not limited to:

- 6 • recommendation algorithms, powered by extensive data collection, which  
7 Meta intentionally designs and programs to promote excessive and frequent  
8 usage among adolescents;
- 9 • features that exploit young users' desire for validation and their tendency to  
10 engage in social comparisons;
- 11 • product features intentionally designed by Meta to create harmful cycles of  
12 repetitive and excessive usage;
- 13 • the intentional absence of effective mechanisms, despite having the  
14 capability to implement them, to restrict minors from using the products;
- 15 • inadequate parental controls and the facilitation of unsupervised usage of  
16 the platforms; and
- 17 • deliberate placement of obstacles to discourage and/or prevent users from  
18 ceasing their usage of the products.

19 115. One of the most addictive features of Instagram is its “infinite scroll” feature. “The  
20 convenience of the flick of a finger combined with our desire to solve the uncertainty of what the  
21 next post is about, results in a powerfully addictive force which users often do not realize as they  
22 subconsciously scroll.”<sup>82</sup>

1 116. Additionally, Meta builds user engagement algorithms into its products, which  
2 deliver content to users to elicit the largest reactions, favor posts that generate extreme  
3 engagement, and lead isolated teens and adolescents down dangerous paths.

4 117. Meta is aware that its programmed recommendations push dangerous content to  
5 adolescents and teens, and leaked internal documents from the company show that it was aware of  
6 the harmful effects that its products were having.<sup>83</sup>

7 118. While Meta is increasing user engagement through its algorithms, infinite scroll  
8 feature, and “Explore” page, it is also profiting heavily from that addictive engagement<sup>84</sup> by  
9 collecting user data. Instagram, like many social media platforms, collects data from its users to  
10 offer personalized experiences, deliver targeted advertisements, and generate revenue.

11 119. Meta uses the data it collects, such as users’ interests, demographics, and behavior,  
12 to offer targeted advertising to its users. Advertisers can select specific criteria, such as age range  
13 or interests, to reach their desired audience. By leveraging user data, including that of minors,  
14 Instagram can provide advertisers with valuable targeting options and charge them accordingly. To  
15 monetize this data, Instagram collects and shares 62% of user data with third parties for use in  
16 marketing materials to users.<sup>85</sup>

17 120. By gathering and analyzing user data, Meta compiles comprehensive profiles on its  
18 users, encompassing numerous specific data categories. This enables advertisers to finely target

1 their marketing efforts and allocate advertising funds to precise user segments, facilitated by  
2 Meta's data segmentation. Only a fraction of this data stems from user generated content intended  
3 for publication or explicitly provided in user profiles. Instead, Meta covertly collects many of these  
4 data segments through undisclosed surveillance of user activity, both while using and even when  
5 not logged into the platform. This surveillance includes monitoring user behavior, such as tracking  
6 navigation paths, watch time, and hover time, unbeknownst to the users. Essentially, as Meta's  
7 user database expands, users spend more time on the platform, and Meta extracts increasingly  
8 detailed user information, resulting in greater profits for the company.

9 121. Meta has long known that adolescents who used Instagram felt higher rates of  
10 anxiety and depression.<sup>86</sup>

11 122. Rather than address those serious issues, Meta chose to put profits before the well-  
12 being of vulnerable youth, and made billions of dollars advancing defective products, making  
13 money off of data collected from adolescents who disclose depression symptoms and suicidal  
14 ideation via social media as well as those who attempt to help.<sup>87</sup>

15 123. In this way, Meta has promoted the mental health crisis among youth users as it  
16 pushes dangerous content, popularizing posts disclosing depression symptoms and suicidal  
17 ideation as Meta understands that those posts elicit the most engagement amongst its target youth  
18 market, while suppressing and censoring avenues for youth users to receive actual help mental  
19 health crisis.<sup>88</sup>

1           **B. Google Makes Significant Profits Off of Its YouTube Product Resulting**  
2           **from Its Algorithm that Promotes Suicidal Ideation and Exposes Youth**  
3           **Users to Further Concerning Content**

4           124. YouTube, a Google product,<sup>89</sup> allows users to watch videos online and through  
5 applications. YouTube incorporates targeted and meticulously designed functionalities that are  
6 purposely aimed at leveraging the psychological mechanisms of user behavior and gratification,  
7 with the goal of maximizing their engagement in terms of duration, frequency, and intensity.

8           125. YouTube was designed to be addictive. It is the most popular social platform in the  
9 United States, and over half of Internet users use it every day (36% report using it several times  
10 per day).<sup>90</sup>

11           126. Many users have documented their experiences with YouTube addiction online,  
12 many comparing the product to a “drug” and commenting:

13                   (a) “If you’ve been watching videos on the Anunnaki and ancient alien space-  
14 traveling civilizations, YouTube will show you more of where you last left off when you next click  
15 on.”<sup>91</sup>

16                   (b) “I will try out the 3 videos a day strategy, which some people here already  
17 suggested, but I don’t think I can control myself. Do you have any tips to how I can cut back on  
18 my YT usage?”<sup>92</sup>

19 \_\_\_\_\_

(Dec. 19, 2022), <https://explodingtopics.com/blog/social-media-addiction>.

27 <sup>91</sup> Domingo Cullen, *YouTube addiction: binge watching videos became my ‘drug of choice,’*  
28 Guardian (May 3, 2019), [https://www.theguardian.com/us-news/2019/may/03/youtube-addiction-  
29 mental-health](https://www.theguardian.com/us-news/2019/may/03/youtube-addiction-mental-health).

30 <sup>92</sup> Reddit Post, *6 hours per day*, r/youtubeaddiction (Jan. 11, 2020)  
[https://www.reddit.com/r/youtubeaddiction/comments/en8kx5/6\\_hours\\_per\\_day/](https://www.reddit.com/r/youtubeaddiction/comments/en8kx5/6_hours_per_day/).

1 (c) “I feel like I’ve tried so much putting limits on and just completely ignoring  
2 it to deleting the app and then just going on safari instead. I genuinely think YouTube is killing  
3 me and my productivity slowly I keep saying to myself one more video then next thing you know  
4 one hours gone by then two hours, then I think to myself why the fuck am I doing this to myself  
5 and I eventually forget about all the shit I’ve just watched and it’s a complete waste of time. I don’t  
6 know man I feel like I’m even replacing person to person communication with watching videos as  
7 in a weird way it still feels like I’m interacting with someone when I’m clearly not. I’m guessing  
8 I’m semi addicted to it but has anyone got any advice, cheers.”<sup>93</sup>

9 (d) “I thought quitting weed would help but it hasn’t. My addiction started with  
10 adderall. I would take it and just go hour on end because every video seemed more interesting than  
11 the last. It’s like I get stuck in this dopamine loop that I can’t get out of. I’ve quit all drugs for a  
12 while now but I can’t seem to stop. I deleted the app on my phone but eventually I just go to the  
13 website. Fuck my life y’all.”<sup>94</sup>

14 127. Adolescent YouTube users are especially vulnerable to the addictive and defective  
15 nature of YouTube<sup>95</sup> given the effect the product’s algorithm has on their still-developing brains.  
16 In a recent survey, 95% of teens said that they use YouTube, with three-quarters of them visiting it  
17  
18

<https://www.youtube.com/watch?v=v9EKV2nSU8w&t=855s>.

1 at least daily, and 19% of them using it “almost constantly.”<sup>96</sup> And YouTube remains the top social  
2 media product that teens would not want to “live without.”<sup>97</sup>

3 128. YouTube’s recommendation algorithm, which is built on Google’s code, takes into  
4 account user watch history and video features to recommend highly engaging videos for individual  
5 users. The end-result is a highly addictive product:

6 YouTube as a platform fulfills those requirements for addiction. The videos  
7 provide us with relevant information that stimulate a dopamine response.  
8 This process is constantly reinforced by consistently supplying us with more  
9 appropriately recommended videos. YouTube can also modify our behavior  
10 by carefully selecting certain videos by the means of our own perceived  
11 autonomy.<sup>98</sup>

12 129. YouTube was purposefully designed to be addictive through its autoplay and  
13 recommendation features. Recommended videos appear on a user’s home page and next to videos  
14 in an “Up Next” display. The “Up Next” display shows limitless videos that YouTube algorithms  
15 recommend to users, designed to be addictive. As a former engineer of YouTube’s recommendation  
16 system stated:

17 “It isn’t inherently awful that YouTube uses AI to recommend video for  
18 you, because if the AI is well tuned it can help you get what you want. This  
19 would be amazing,” [Guillaume] Chaslot told TNW. “But the problem is  
20 that the AI isn’t built to help you get what you want—it’s built to get you  
21 addicted to YouTube. Recommendations were designed to waste your  
22 time.”<sup>99</sup>

23 130. A recent study confirmed that, while YouTube’s features can increase ease of use,  
24 they are fundamentally defective because they result in over-watching and compulsive behaviors:

25 <sup>96</sup> Emily A. Vogels, *et al.*, *Teens, Social Media and Technology 2022*, Pew Rsch. Ctr. (Aug.  
26 10, 2022), <https://www.pewresearch.org/internet/2022/08/10/teens-social-media-and-technology-2022/>.

<sup>98</sup> *How YouTube is Addictive—Recommendation Systems & its Impacts*, Medium (Sept. 2,  
2019), <https://medium.com/dataseries/how-youtube-is-addictive-259d5c575883>.

<sup>99</sup> Már Másson Maack, ‘YouTube recommendations are toxic,’ says dev who worked on the  
algorithm, Next Web (June 14, 2019), <https://thenextweb.com/news/youtube-recommendations-toxic-algorithm-google-ai>.

1 Through our online diary study, we performed an in-depth analysis of UI  
2 features, specifically Autoplay and Recommendations, on popular online  
3 streaming platforms in India. We studied their impact on the user's state of  
4 mind measuring their level of awareness and feeling of satisfaction while  
5 selecting and completing a video for watching. We also included contextual  
6 effects of individual characteristics and viewing preference as additional  
7 factors that also have a tendency to influence user behaviors. We have  
8 centered our analysis on the relation of UI interactions' ease of use and  
9 autonomy affordability and their temporal effect on the user's feelings,  
10 mostly over-watching and regret. We observed that although these features  
11 enable ease of use, they enforce compulsive behaviors on long term  
12 usage.<sup>100</sup>

13 131. YouTube's autoplay feature is a "dark pattern," a design feature that manipulates  
14 users into scrolling for as long as possible to increase interaction with the product,<sup>101</sup> and thus  
15 increase profits.

16 132. The result is addiction by design:

17 "But why are these tactics being used?"

18 The simple answer is to keep you hooked. To the decision-makers behind  
19 this, it doesn't matter if it's ethical or not. For most of them, you are just a  
20 statistic, and they want you to stay on their platform, no matter what it  
21 takes.

22 Some of them aren't even aware of how much damage these tactics are  
23 doing. And those who are aware of this care only about the results."<sup>102</sup>

24 133. The autoplay feature was so damaging and created such an addictive effect in  
25 children that YouTube eventually disabled it for children.

26 "Autoplay is a manipulative tool used by YouTube to addict users and  
27 keeps them on the platform, and kids are especially vulnerable to this,"  
28 [Justin] Ruben [co-Director of ParentsTogether, a family advocacy non-  
profit] said in a press release. "Turning off autoplay is an important step in  
the fight to keep kids safe on the Internet, and YouTube should extend it to

<sup>100</sup> Akash Chaudhary, *et al.*, "Are You Still Watching?": Exploring Unintended User Behaviors and Dark Patterns on Video Streaming Platforms, ACM Digit. Lib. (June 2022), <https://dl.acm.org/doi/fullHtml/10.1145/3532106.3533562>.

<sup>101</sup> Kate Raynes-Goldie, Ph.D., *Dark Patterns: The Secret Sauce Behind Addictive Tech*, Particle (Jan. 30, 2020), <https://particle.scitech.org.au/tech/dark-patterns-the-secret-behind-addictive-tech/>.

<sup>102</sup> Dr. Marisa Azaret, *Why are kids so addicted to screens?*, Nicklaus Children's Hos. (Feb. 19, 2024), <https://www.nicklauschildrens.org/campaigns/safesound/blogposts/why-are-kids-so-addicted-to-screens>.

1 all children’s videos, even if they’re watched on a parent’s account on  
2 YouTube.”<sup>103</sup>

3 134. But the autoplay feature at times relevant to this Complaint continued to run even  
4 if a user was not logged into his or her account—even if that user was a child.<sup>104</sup>

5 135. YouTube’s decisionmakers knew that its defective design choices would create  
6 young addicts and yet made those choices specifically to make its product addictive. More than  
7 70% of the time people spend watching videos on YouTube is driven, explicitly, by YouTube’s  
8 algorithmic recommendations.<sup>105</sup> And mobile device users watch YouTube for more than 60  
9 minutes on average because, as YouTube Chief Product Officer Neal Mohan stated, “of what  
10 [YouTube’s] recommendations engines are putting in front of” users.<sup>106</sup>

11 136. YouTube’s addictive nature is one part of its problematic design; the other is that  
12 its algorithm frequently recommends extreme and violent videos—to adults *and* adolescents,  
13 alike.<sup>107</sup> Engineers at YouTube have determined that pushing users to extremities increases  
14 engagement with the platform.

15 137. “Engaging content” is recommended by YouTube based upon watch time—which  
16 means that the videos YouTube recommends are those which can be monetized. This might be  
17

28

1 great for a company trying to sell ads, but it doesn't necessarily reflect what the user wants—and  
2 has grave side-effects.<sup>108</sup>

3 138. The basic structure of YouTube's recommendation algorithm may have been  
4 effective for the core types of content, such as cat videos, gaming, and music, yet as YouTube  
5 becomes more central in people's information and news consumption, former YouTube engineers  
6 worry that will push people further to extremes—whether they want it or not—as it's in YouTube's  
7 financial interest to keep users watching for as long as possible.<sup>109</sup>

8 139. With the algorithm prioritizing engagement over all other matters, adolescents and  
9 children became increasingly exposed to dangerous and harmful content, which YouTube  
10 monetized for profit.<sup>110</sup> YouTube has accomplished its mission—to create adolescent addicts to  
11 make money.

12 **C. Snap Intentionally Created and Markets its Snapchat Product to**  
13 **Addict Young Users and Designed the Platform with Features that**  
**Expose Children, Adolescents, and Teenagers Directly to Harm**

14 140. Snap describes itself as a camera company, and Snapchat, its primary product,  
15 allows users to send text, picture, and video messages called “snaps,” which disappear after being  
16 viewed by the recipients.<sup>111</sup>

17 141. In 2014, Snap commenced displaying advertisements on Snapchat. Since then,  
18 Snap's business model has primarily relied on generating revenue from advertising. In 2022, 70%

23 <sup>108</sup> *Id.*; Már Másson Maack, 'YouTube recommendations are toxic,' says dev who worked on  
24 the algorithm, TNW (June 14, 2019, 10:58 AM), <https://thenextweb.com/news/youtube-recommendations-toxic-algorithm-google-ai>.

25 <sup>109</sup> *Id.*

26 <sup>110</sup> Guillaume Chaslot, *The Toxic Potential of YouTube's Feedback Loop*, Wired (July 13,  
2019), <https://www.wired.com/story/the-toxic-potential-of-youtubes-feedback-loop/>.

27 <sup>111</sup> Dan Levin, *A Racial Slur, a Viral Video, and a Reckoning*, N.Y. Times (Dec. 26, 2020),  
28 <https://www.nytimes.com/2020/12/26/us/mimi-groves-jimmy-galligan-racial-slurs.html>.

1 of Snap’s revenue originated from North America, and 99% of that revenue was generated through  
2 advertising dollars.<sup>112</sup> Snapchat generated \$4.6 billion in revenue in 2022.<sup>113</sup>

3 142. Snap deliberately targets children, adolescents, and teenagers in its marketing  
4 efforts for Snapchat, exploiting their emotional and physiological underdevelopment, which  
5 causes their inclination towards instant gratification, which ultimately benefits Snap’s advertising  
6 business.

7 143. Snapchat’s design is carefully tailored to maximize user engagement, particularly  
8 among minors. The platform employs various strategies that entice young individuals to spend  
9 extended periods of time using the app.

10 144. One of the key tactics employed by Snapchat is the implementation of streaks,  
11 which are endless back-and-forth exchanges of snaps between users. Streaks create a sense of  
12 obligation and social pressure for users to maintain daily communication, leading to increased app  
13 usage. This designed constant compulsion to keep streaks “alive” can disrupt real-life interactions,  
14 impede productivity, and contribute to a sense of dependency on the platform.<sup>114</sup>

15 145. Snapchat’s user interface contributes to increased engagement among minors. The  
16 app utilizes a “streak counter” that displays the number of consecutive days a user has maintained  
17 a streak with another user. This visual creates a designed sense of accomplishment and fuels the  
18 fear of losing the streak—specifically in adolescents—compelling users to frequently check and  
19 interact with the app to preserve their streaks.<sup>115</sup>

21 <sup>112</sup> Matthew Johnston, *Snapchat generates nearly all of its revenue from ads*, Investopedia

28 *Score*, Insider (Aug. 18, 2022), <https://www.businessinsider.com/guides/tech/snapchat-streak>.

1 146. Furthermore, Snapchat’s use of gamification features (game elements used in non-  
2 game contexts), such as trophies and rewards for achieving certain milestones, encourages users  
3 to continually engage with the app. By incorporating elements of competition and achievement,  
4 Snapchat taps into the psychological desire for recognition and accomplishment, driving users,  
5 especially minors, to dedicate considerable time and attention to the platform.<sup>116</sup>

6 147. The detrimental effects of Snapchat’s design on minors are significant. Excessive  
7 usage of the platform can lead to decreased face-to-face social interactions, diminished focus on  
8 academic or extracurricular activities, and a heightened risk of developing addictive behaviors.  
9 Moreover, the constant exposure to carefully curated and filtered images on Snapchat can  
10 contribute to feelings of insecurity and a distorted sense of reality for young users.<sup>117</sup>

1 constantly.<sup>120</sup> In another recent report, more than 13% of young users declared they “wouldn’t  
2 want to live without” TikTok.<sup>121</sup>

3 150. The rampant growth in the number of young users and the amount of time such  
4 users spend on TikTok is a result of intentional design and marketing efforts on behalf of  
5 ByteDance.

6 “Teenagers in the U.S. are a golden audience,”  
7 – Alex Zhu, Former TikTok President and current ByteDance  
8 Product Strategist.<sup>122</sup>

9 151. Motivated by the fear of not being able to keep up with competitors’ numbers, Mr.  
10 Zhu explained to *Business Insider* that businesses need to keep its adolescent users “always  
11 engaged.”<sup>123</sup>

12 152. To monetize a U.S. teenage audience, Mr. Zhu and ByteDance implemented a series  
13 of product features designed to attract and addict young users. ByteDance has since designed and  
14 coded TikTok with features that foster addictive and compulsive use by youth, leading to a cascade  
15 of additional mental and physical injuries.<sup>124</sup>

16 153. Mr. Zhu knew that young users were vulnerable and susceptible to compulsive use  
17 of their Social Media Platform. Acting on that knowledge, TikTok employed addictive tactics in

1 their design and marketing efforts, leading to rampant “engagement” of young users with its Social  
2 Media Platform.<sup>125</sup>

3 154. One of TikTok’s defining features is its “For You” page (or “FYP”), also known as  
4 the “For You” feed (“FYF”). The FYP is a personalized feed of videos that TikTok’s algorithm  
5 curates based on a user’s interests and interactions with the app.<sup>126</sup> According to ByteDance, FYP  
6 is “central to the TikTok experience and where most of our users spend their time.” Also, according  
7 to the Addiction Center, TikTok’s addictive nature was designed around the steady flow of content  
8 that provides enjoyment, demands a user’s concentration, and distorts the perception of time.<sup>127</sup>

9 155. ByteDance designed TikTok so users could not disable the auto-play function on the  
10 FYP such that when a user opens the TikTok app or visits the TikTok website, the product  
11 immediately begins playing a video on the user’s FYP. The user may request more videos with a  
12 simple upward swipe, and the product will deliver an endless content stream. If a user does not  
13 proceed from a video, it continues to play on an endless loop. The ability to scroll continuously  
14 induces a “flow-state” and distorts users’ sense of time.<sup>128</sup>

15 156. The TikTok interface is designed with only a limited number of buttons and sections  
16 for users to navigate, such that the platform’s design does not impede “flow.”

17 157. TikTok’s FYP also leverages principles of intermittent reinforcement to encourage  
18 compulsive usage, in the same fashion as Instagram Reels. A user swipes to receive the next  
19 video, and each swipe offers the prospect (but not the certainty) of dopamine-releasing stimuli.

1 158. TikTok’s FYP creates what psychology researchers refer to as being “caught in an  
2 entertainment spiral.”<sup>129</sup> The FYP is enhanced by ByteDance’s design of TikTok’s algorithm,  
3 which determines what the user is interested in to show content they are most likely to enjoy,  
4 causing a user to become engrossed in a perpetual stream of content.<sup>130</sup>

5 159. As one industry commentator explained, TikTok uses “a machine-learning system  
6 that analyzes each video and tracks user behavior so that it can serve up a continually refined,  
7 never-ending stream of TikToks optimized to hold [users’] attention.”<sup>131</sup> As another commentator  
8 put it, “you don’t tell TikTok what you want to see. It tells you.”<sup>132</sup>

9 160. Mr. Zhu has divulged that TikTok’s algorithms are “focused primarily on increasing  
10 the engagement of existing users.”<sup>133</sup> As a consequence of TikTok’s decision to focus on  
11 engagement, its algorithm causes harmful and exploitative content to be amplified to the young  
12 market it has cultivated and targeted.

13 161. The algorithm encourages use of the product, regardless of whether that use is  
14 enjoyable or healthy—the engagement itself is the end goal.

15 162. The Center for Countering Digital Hate (“CCDH”) is a United States-headquartered  
16 international nonprofit that disrupts the architecture of online hate and misinformation.<sup>134</sup> CCDH’s  
17 researchers conducted a robust study in December 2022, in which they set up new accounts at the

[video-social-network-quickly-capturing-the-tween-and-teen-m.html](https://www.inc.com/joseph-steinberg/meet-musically-the-video-social-network-quickly-capturing-the-tween-and-teen-m.html).

27 <sup>134</sup> *Deadly by Design*, *Ctr. for Countering Digit. Hate* (Dec. 15, 2022),  
28 <https://counterhate.com/research/deadly-by-design/>.

1 minimum age TikTok allows, 13 years old.<sup>135</sup> For the first 30 minutes on the app, the accounts  
2 paused briefly on videos about body image and mental health and liked them. For all other videos,  
3 researchers on the minor accounts would immediately scroll the FYF to view the next video  
4 recommended by TikTok.

5 *Within 2.6 minutes, TikTok recommended suicide content to users*  
6 *it registered as minors.*

7 *Within 8 minutes, TikTok served content related to eating*  
8 *disorders to users it registered as minors.*

9 *Every 39 seconds, TikTok recommended videos about body image*  
10 *and mental health to users it registered as minors.*<sup>136</sup>

11 163. CCDH's research demonstrates how ByteDance has successfully designed its  
12 TikTok platform to bombard young users' feeds with harmful, harrowing content that has  
13 devastating cumulative impacts on young users' understanding of the world around them, and their  
14 physical and mental health.<sup>137</sup>

15 164. In the context of young users, TikTok's rabbit holes are devastatingly problematic  
16 for children, adolescents, and teenagers who, due to their young age, lack the necessary impulse  
17 control required by the Social Media Platform to stop watching content that is continuously playing  
18 with little to no effort on behalf of the user. The more the user engages with TikTok by viewing  
19 content, hesitating on a particular piece of content, or without attempting to stop it, the more  
20 TikTok's algorithms learn about the user. ByteDance uses this feature to exploit the vulnerabilities  
21 of children and teenagers and addict them to its product.

22 165. TikTok identifies a young user's vulnerability and capitalizes on it. The vulnerable  
23 accounts in the CCDH study received 12 times more recommendations for self-harm and suicide  
24 videos than the standard accounts.

26 <sup>136</sup> Elizabeth Germino, *TikTok pushes potentially harmful content to users as often as 39*  
27 *seconds, study says*, CBS News (Dec. 14, 2022), <https://www.cbsnews.com/news/tiktok-pushes-potentially-harmful-content-to-users-as-often-as-every-39-seconds-study/>.

28 <sup>137</sup> *Id.*

1           166. In another experiment, *The Wall Street Journal* found that TikTok’s algorithm  
2 quickly pushed users down rabbit holes where they were more likely to encounter harmful content.  
3 *The Wall Street Journal* investigated how TikTok’s algorithm chose what content to promote to  
4 users by having 100 bots scroll through the FYF. Each bot was programmed with interests, such  
5 as extreme sports, forestry, dance, astrology, and animals. Those interests were not disclosed in the  
6 process of registering their accounts. Rather, the bots revealed their interests through their  
7 behaviors, specifically the time they spent watching the videos TikTok recommended to them.  
8 Consistent with TikTok’s leaked internal “Algo 101” document, *The Wall Street Journal* found that  
9 time spent watching videos was “the most impactful data on [what] TikTok serves [users].”<sup>138</sup>

10           167. Over the course of 36 minutes in the experiment, one bot watched 224 videos,  
11 lingering over videos with hashtags for “depression” or “sad.” From then on, 93% of the videos  
12 TikTok showed this account were about depression or sadness.<sup>139</sup>

13           168. This experience is not a rare occurrence, rather, it is what millions of young users  
14 are battling every day. Former YouTube engineer Guillaume Chaslot, who worked on the algorithm  
15 for YouTube, explained that 90% to 95% of the content users see on TikTok is based on its  
16 algorithm. “[E]ven bots with general mainstream interests got pushed to the margin as the  
17 recommendations got more personalized and narrow.” Deep in these rabbit holes, *The Wall Street*  
18 *Journal* found “users are more likely to encounter potential harmful content.”<sup>140</sup>

19           169. Chaslot explained why TikTok feeds users this content:

20                   [T]he algorithm is able to find the piece of content that you’re  
21                   vulnerable to. That will make you click, that will make you watch,  
22                   but it doesn’t mean you really like it. And that it’s the content that  
23                   you enjoy the most. It’s just the content that’s most likely to make  
24                   you stay on the platform.<sup>141</sup>

---

24           <sup>138</sup> *Inside TikTok’s Algorithm: A WSJ Video Investigation*, Wall St. J. (July 21, 2021),  
25 <https://www.wsj.com/http://www.wsj.com/articles/tiktok-algorithm-video-investigation-11626877477>.

26           <sup>139</sup> *Id.*

27           <sup>140</sup> *Id.*

28           <sup>141</sup> *Id.*

1           170. A follow-up investigation by *The Wall Street Journal* found “that through its  
2 powerful algorithms, TikTok can quickly drive minors—among the biggest users of the app—into  
3 endless spools of content about sex and drugs.” The bots in this follow-up investigation were  
4 registered as users aged 13 to 15 and, as before, programmed to demonstrate interest by how long  
5 they watched the videos TikTok’s algorithms served them. The bots scrolled through videos that  
6 did not match their interests without pausing. The bots lingered on videos that matched any of  
7 their programmed interests. Every second the bot hesitated or rewatched a video again proved  
8 key to what TikTok recommended to the accounts, which *The Wall Street Journal* found was  
9 used to “drive users of any age deep into rabbit holes of content.”<sup>142</sup>

10           171. For example, one bot was programmed to pause on videos referencing drugs,  
11 among other topics. The first day on the platform, the “account lingered on a video of a young  
12 woman walking through the woods with a caption suggesting she was in search of marijuana.”  
13 The following day, the bot viewed a video of a “marijuana-themed cake.” The “majority of the  
14 next thousand videos” TikTok directed at the teenage account “tout[ed] drugs and drug use,  
15 including marijuana, psychedelics and prescription medication.”<sup>143</sup>

16           172. TikTok similarly zeroed in on and narrowed the videos it showed accounts whether  
17 the bot was programmed to express interest in drugs, sexual imagery, or a multitude of interests.  
18 In the first couple of days, TikTok showed the bots a “high proportion of popular videos.” “But  
19 after three days, TikTok began serving a high number of obscure videos.”<sup>144</sup>

20           173. For example, a bot registered as a 13-year-old was shown a series of popular videos  
21 upon signing up. The bot, which was programmed to demonstrate interest in sexual text and  
22 imagery, also watched sexualized videos.<sup>145</sup>

---

24 <sup>142</sup> Rob Barry, *et al.*, *How TikTok Serves Up Sex and Drug Videos to Minors*, Wall St. J. (Sept.  
25 8, 2021), [https://www.wsj.com/articles/tiktok-algorithm-sex-drugs-minors-11631052944?st=e92pu5734lvc7ta&reflink=desktopwebshare\\_permalink](https://www.wsj.com/articles/tiktok-algorithm-sex-drugs-minors-11631052944?st=e92pu5734lvc7ta&reflink=desktopwebshare_permalink).

26 <sup>143</sup> *Id.*

27 <sup>144</sup> *Id.*

28 <sup>145</sup> *Id.*

1           174. At least 2,800 of the sexualized videos that were shown to *The Wall Street Journal*'s  
2 bots were labeled as being for adults only. However, TikTok directed these videos to the minor  
3 accounts because, as TikTok told *The Wall Street Journal*, it does not “differentiate between videos  
4 it serves to adults and minors.”<sup>146</sup>

5           175. TikTok also directed a concentrated stream of videos at accounts programmed to  
6 express interest in a variety of topics. One such account was programmed to linger over hundreds  
7 of Japanese film and television cartoons. “In one streak of 150 videos, all but four” of the videos  
8 TikTok directed at the account “featured Japanese animation—many with sexual themes.”<sup>147</sup>

9           176. ByteDance admits that its recommendation algorithm creates a “risk of presenting  
10 an increasingly homogeneous stream of videos.” As the studies discussed and experiments  
11 demonstrate, that homogeneous stream often includes harmful content, including posts about  
12 depression, self-harm, drugs, and extreme diets.<sup>148</sup>

13           177. The relentless stream of content intended to keep users engaged “can be especially  
14 problematic for young people” because they may lack the capability to stop watching, says David  
15 Anderson, a clinical psychologist at the nonprofit mental health care provider, The Child Mind  
16 Institute.<sup>149</sup>

17           178. TikTok’s rampant growth among youth users is enabled by the Social Media  
18 Platform’s defective age verification and parental control procedures, which ByteDance designed  
19 to allow children under 13 unfettered access to its platform.

20           179. When a user first initiates TikTok’s sign-up process, they are prompted to “Login in  
21 to TikTok” or “Sign up” for an account using a phone number or email address. TikTok then asks,  
22

26 <sup>149</sup> Tawnell D. Hobbs *et al.*, *The Corpse Bride Diet: How TikTok Inundates Teens With Eating-*  
27 *Disorder Videos*, Wall St. J. (Dec. 17, 2021), [https://www.wsj.com/articles/how-tiktok-inundates-](https://www.wsj.com/articles/how-tiktok-inundates-teens-with-eating-disorder-videos-11639754848)  
28 [teens-with-eating-disorder-videos-11639754848](https://www.wsj.com/articles/how-tiktok-inundates-teens-with-eating-disorder-videos-11639754848) (some of the accounts performed searches or sent  
other, undisclosed signals indicating their preferences).

1 “When’s your birthday?” In 2016, the birth date for those signing up for the platform defaulted to  
2 the year 2000 (*i.e.*, 16 years old).<sup>150</sup>

3 180. ByteDance did not verify whether individuals were minors that had the consent of  
4 their parents or legal guardians to use its product. Even by 2020, TikTok still had not developed a  
5 company position on age verification.<sup>151</sup> The significant harm done as a result of TikTok’s delay  
6 has injured countless children and adolescents.

7 181. Further, for a period of time, TikTok users could circumvent TikTok’s age  
8 restrictions by using TikTok without creating an account. TikTok allows users, no matter what age,  
9 to “browse as [a] guest,” and watch TikTok’s FYP while TikTok’s algorithm collects data about  
10 that user and their viewing behavior.<sup>152</sup>

11 182. Until recently, ByteDance’s Trust and Safety team recognized that one of the  
12 biggest challenges it faced was determining who is a minor on its platform; ByteDance knew that  
13 millions of TikTok users were under the age of 13 and do not to report their birth dates accurately.

14 183. In 2019, the FTC acted on this admission and alleged that ByteDance failed to  
15 comply with COPPA. ByteDance settled the FTC claims, agreeing to a then-record civil COPPA  
16 penalty and several forms of injunctive relief intended to protect children who use the product.<sup>153</sup>

26 <sup>153</sup> Natasha Singer, *TikTok Broke Privacy Promises, Children’s Groups Say*, N.Y. Times (May  
27 14, 2020), <https://www.nytimes.com/2020/05/14/technology/tiktok-kids-privacy.html#:~:text=TikTok%2C%20the%20popular%20app%20for%20making%20and%20sh>  
28 [a%20ring,20%20children%E2%80%99s%20and%20consumer%20groups%20said%20on%20T](https://www.nytimes.com/2020/05/14/technology/tiktok-kids-privacy.html#:~:text=TikTok%2C%20the%20popular%20app%20for%20making%20and%20sh)  
[hursday](https://www.nytimes.com/2020/05/14/technology/tiktok-kids-privacy.html#:~:text=TikTok%2C%20the%20popular%20app%20for%20making%20and%20sh).

1 184. To comply with the terms of the resulting settlement, ByteDance created “TikTok  
2 for Younger Users,” a “limited app experience” for users under the age of 13.<sup>154</sup> “TikTok for  
3 Younger Users” does not permit users to “share their videos, comment on others’ videos, message  
4 with users, or maintain a profile or followers.”<sup>155</sup> Users, however, can still “experience what  
5 TikTok is at its core” by recording and watching videos on TikTok. For that reason, experts state  
6 the app is “designed to fuel [kids’] interest in the grown-up version.”<sup>156</sup>

7 185. Beyond these inadequate controls, children under the age of 13 can also easily  
8 delete their age-restricted accounts and sign up for an over-13 account on the same mobile device—  
9 without any restriction or verification—using a fake birthdate with ease.

10 186. ByteDance uses a series of interrelated design features, including those  
11 aforementioned, that exploit known mental processes to induce TikTok’s users to use the product  
12 more frequently, for more extended periods, and with more intensity (*i.e.*, providing more  
13 comments and likes).

14 187. As a result of ByteDance’s product design, implementation, marketing, and  
15 distribution, tribal youth have suffered severely in becoming addicted to the TikTok product,  
16 suffering mental health problems as a result.

17 **VI. DEFENDANTS’ COLLECTIVE SCHEME TO EXPLOIT VULNERABLE**  
18 **CHOCTAW NATION YOUTH BY MISREPRESENTING THE SAFETY OF**  
**THEIR SOCIAL MEDIA PLATFORMS**

19 **A. The Social Media Defendants’ Gambit to Exploit and Addict Choctaw**  
20 **Nation Youth by Similar, Industry-Shared Schemes**

21 188. The Social Media Defendants, including ByteDance, Google, Meta, and Snap,  
22 formed an association-in-fact enterprise for the purpose of deliberately addicting vulnerable young  
23 users to their platforms, in order to maximize engagement and thus maximize advertising revenues.

28 <https://ifstudies.org/blog/is-tiktok-dangerous-for-teens->.

1 189. While social media companies are technically “competitors,” there are ways in  
2 which they collaborate that contribute to the addictive nature of their platforms for Choctaw Nation  
3 youth. This collaboration occurs through industry practices, research sharing, and the adoption of  
4 similar design strategies.

5 190. Social media companies often share research through academic collaborations,  
6 conferences, and trade associations, including, based upon information and belief, studies and  
7 strategies related to user engagement, retention, and optimization of products for habitual use.

8 191. Conferences related to human-computer interaction, engineering, and product  
9 design and development attract researchers and engineers from social media companies who  
10 present findings on user behavior, algorithm optimization, and design innovations. Insights from  
11 these gatherings influence the development of new features that increase user engagement.

12 192. Defendants and their employees, researchers, and former engineers discuss and  
13 publish their findings on artificial intelligence, algorithms, attention metrics, and human-computer  
14 interaction, some of which directly informs how platforms are built to engage users. By sharing  
15 this research publicly, companies allow one another to benefit from discoveries on how to keep  
16 users engaged.

17 193. Many of the engineers, designers, and product managers who work on addictive  
18 features at one social media company often move to others. This creates a diffusion of knowledge  
19 and best practices across the industry.<sup>157</sup>

20  
21 <sup>157</sup> For instance, Google hired TikTok’s North American head, Kevin Ferguson, to develop  
22 YouTube Shorts. J. Clara Chan, *TikTok Creators Turn to YouTube Shorts Amid “Insane”*  
23 *Subscriber Growth*, The Hollywood Reporter (Aug. 21, 2021),  
24 [https://www.hollywoodreporter.com/business/digital/tiktok-creators-youtube-shorts-amid-](https://www.hollywoodreporter.com/business/digital/tiktok-creators-youtube-shorts-amid-insane-subscriber-growth-1235002615/)  
25 [insane-subscriber-growth-1235002615/](https://www.hollywoodreporter.com/business/digital/tiktok-creators-youtube-shorts-amid-insane-subscriber-growth-1235002615/); ByteDance hired Blake Chandlee, Facebook's former VP  
26 of global partnerships, as TikTok's new head of strategic partnerships. Chandlee spent about a  
27 decade working on Facebook’s business partnerships in Europe, Latin America and the U.S.  
28 ByteDance also hired a seven-year veteran of YouTube, Vanessa Pappas, who was previously  
YouTube’s global head of creative insights as TikTok’s first general manager in the U.S. *See* Mark  
Bergen, *TikTok Ramps Up Recruiting From Big Tech With Facebook Exec Hire*, Yahoo!Finance

December of 2019 and was previously the Head of Agency Measurement at Facebook. Advertising

1 194. The Social Media Defendants exclusively control the most popular social media  
2 platforms and collectively dominate the social U.S. digital advertising market.<sup>158</sup>

3 195. It is not a coincidence that the Social Media Defendants and each of their respective  
4 Social Media Platforms—Instagram, Facebook, TikTok, Snapchat, and YouTube—control the  
5 social media industry and all use the same exploitive business practices. Each of the Social Media  
6 Defendants and their executives maximize profits from advertising revenue by collectively  
7 engaging in the following shared practices: (1) pursuing business models that maximize the  
8 number of child users to monopolize as much of their attention as possible to generate more ad  
9 revenue; (2) suppressing knowledge that young users are uniquely susceptible to addictive features  
10 in digital products and highly vulnerable to the resulting harm; (3) implementing the same core  
11 addictive features on each platform through automated attention farming achieved by content-  
12 agnostic algorithms and recommendations fed by data about user interactions that deliberately  
13 exploit the psychology and neurophysiology of young people; (4) failing to implement effective  
14 parental controls; and (5) failing to implement age verification processes to determine users' ages,  
15 among others.

27 growth and product marketing, Ty Ahmad-Taylor; Doug Fraser, VP of business planning and  
28 operations; VP of product marketing Pooja Piyaratna; and Ajit Mohan, who joined Snap as  
president of Asia-Pacific in January 2023 after serving as Meta's VP of India, and Ronan Harris,  
formerly Google's VP, joined Snap as president of EMEA in late 2022. *Id.* Additionally, Darshan  
Kantak was recently named Snap's SVP of revenue product, after serving as Google's VP of search  
ads. *Id.*

158 Stefan Larson, *Social Media Users 2024 (Global Data & Statistics)*, Priori Data (March  
26, 2024), <https://prioridata.com/data/social-media-usage>.

1 196. The Social Media Defendants’ success is in significant part the result of a nearly  
2 decade-long scheme to collectively gaslight and defraud the public into believing that its products  
3 did not have detrimental effects on adolescents.<sup>159</sup> The Defendants’ association to accomplish the  
4 goals of increasing revenue via ensuring user engagement is referred to herein as the “Strategic  
5 Partnership Enterprise.”

6 197. The Strategic Partnership Enterprise consists of the Social Media Defendants.

7 198. To fully appreciate the scope of Defendants’ scheme to defraud guardians and the  
8 Choctaw Nation’s youth one must understand social media and advertising market, and the role  
9 that the members of the Strategic Partnership Enterprise play as social media companies that  
10 dominate the social media and digital advertising industry.

11 199. Social Media Defendants sell themselves as social media companies, but their  
12 actual source of revenue is in advertising sales. Although Defendants’ platforms are ostensibly free  
13 of charge, in reality, Defendants charge users by collecting their data, which they then leverage  
14 into advertising revenue.

15 200. Recently, researchers at Boston Children's Hospital and Harvard University used  
16 public survey and market research data to comprehensively estimate Facebook, Instagram,  
17 Snapchat, TikTok, X (Twitter), and YouTube’s number of youth users and related advertising  
18 revenue.<sup>160</sup> They combined these estimates with market research data on advertising revenue  
19 across the platforms in simulation models to assess how much ad revenue the various platforms  
20 earned from child and adolescent users. In December 2023, the study revealed that the Social  
21 Media Defendants’ five platforms plus X (formerly known as Twitter) collectively made nearly  
22 \$11 billion in advertising revenue from U.S. users under the age of 18 in 2022. Researchers found

25 *Company Documents Show*, Wall St. J. (Sept. 14, 2021), [https://www.wsj.com/articles/facebook-  
26 knows-instagram-is-toxic-for-teen-girls-company-documents-show-  
11631620739?mod=hp\\_lead\\_pos7&mod=article\\_inline](https://www.wsj.com/articles/facebook-knows-instagram-is-toxic-for-teen-girls-company-documents-show-11631620739?mod=hp_lead_pos7&mod=article_inline).

27 <sup>160</sup> *Kids’ Ad Revenue for Social Media*, Center for Health Decision Science (Feb. 28, 2024),  
28 <https://chds.hsph.harvard.edu/kids-ad-revenue-for-social-media/>.

1 that the Social Media Defendants’ Social Media Platforms generate substantial advertising revenue  
2 from youth, highlighting the need for “greater data transparency as well as public health  
3 interventions[.]”<sup>161</sup>

4 201. The recent study illustrates the incentive behind Defendants’ platforms conscious  
5 efforts to prey on the time and attention of children who use them compulsively. Their powerfully  
6 addictive nature is intentional; each Defendant has designed, developed, produced, operated,  
7 promoted, distributed, and marketed its platforms not only to maximize the number of child users  
8 but to monopolize as much of their attention as possible.

9 202. Targeting and capturing young users is central to Defendants’ business models.  
10 Because children use Defendants’ platforms more than adults, they see more ads and, as a result,  
11 generate more ad revenue for Defendants. Young users also generate a trove of data about their  
12 preferences, habits, and behaviors. Information about their users is Defendants’ most valuable  
13 commodity. Defendants mine and commodify that data, selling to advertisers the ability to reach  
14 incredibly narrow tranches of the population, including children. Each Defendants’ platforms  
15 affect interstate and foreign commerce, and generate revenues through the distribution of those  
16 platforms at the expense of the Choctaw Nation. This exploitation of the Choctaw Nation’s youth  
17 population is central to Defendants’ profitability model.

22  
23  
24 <sup>161</sup> Jessica Corbett, *Social Media Giants Make Billions Advertising to U.S. Kids*, Common  
25 Dreams (Dec. 27, 2023), <https://www.commondreams.org/news/social-media-and-children>; In  
26 2022, YouTube had 49.7 million U.S.-based users under age 18; TikTok, 18.9 million; Snapchat,  
27 18 million; Instagram, 16.7 million; Facebook, 9.9 million; and X, 7 million. YouTube derived the  
28 greatest ad revenue from users 12 and under (\$959.1 million), followed by Instagram (\$801.1  
million) and Facebook (\$137.2 million). Instagram derived the greatest ad revenue from users ages  
13-17 (\$4 billion), followed by TikTok (\$2 billion) and YouTube (\$1.2 billion). *See also Kids’ Ad  
Revenue for Social Media*, Ctr. for Health Decision Science Harvard T.H. Chan School of Public  
Health (Feb. 28, 2024), <https://chds.hsph.harvard.edu/kids-ad-revenue-for-social-media/>

*Estimated U.S. advertising revenue from users under 18 per social media platform.*<sup>162</sup>

203. In the past decade, Choctaw Nation youth’s engagement with social media has grown. This explosion in usage is no accident. Defendants, through their Social Media Platforms—specifically Instagram, Facebook, TikTok, Snapchat, and YouTube—intentionally induced young people to use their platforms compulsively. Defendants deliberately embedded design features in their platforms to maximize youth engagement to drive advertising revenue. Defendants know young people are in a developmental stage that leaves them particularly vulnerable to the addictive effects of these features. Defendants target them anyway in pursuit of additional profit.

204. Defendants’ choices to design, develop, produce, operate, promote, distribute, and market their Social Media Platforms in ways that are harmful to minors have generated extraordinary corporate profits—and yielded immense tragedy. The Choctaw Nation community has seen a rise in anxiety, depression, and suicidal thoughts among its youth, leading to increased delinquency and behavioral issues. Many young people struggle with time management and impulse control related to social media use, expressing fear and anxiety over online posts.

205. The shared “business strategy” that has enabled the Strategic Partnership Enterprise to successfully defraud vulnerable the Choctaw Nation’s youth and their guardians rests on the

<sup>162</sup> Amanda Raffoul, *et al.*, *Social media platforms generate billions of dollars in revenue from U.S. youth: Findings from a simulated revenue model*. PLoS One (Dec. 27, 2023), <https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0295337>.

1 following 6 pillars: (1) collaborative sharing of industry research and best practices; (2)  
2 coordinated fraudulent and misrepresentative efforts; (3) reliance on the same exploitive  
3 monetization model and intentionally addictive design features; (4) collective concealment and  
4 disregard for the known risks and harms associated with prolonged engagement of youth users; (5)  
5 collaborative data sharing and targeting efforts; and (6) cross-pollination of executives.

6 206. In order to increase advertising revenues, the Social Media Defendants engaged in,  
7 and continue to engage in, deliberately collaborative and coordinated business practices in  
8 furtherance of the Strategic Partnership Enterprise's common purpose of maximizing engagement  
9 by making platforms addictive to vulnerable young users and misrepresenting the nature and safety  
10 of their platforms.

11 207. Social Media Defendants and their executives working together within the Strategic  
12 Partnership Enterprise knowingly devised a scheme to defraud vulnerable Choctaw Nation youth  
13 and their guardians by addicting vulnerable young users to their platforms thereby maximizing  
14 profits.

15 208. During all relevant times, the Social Media Defendants and their executives  
16 maintain complete control over their Social Media Platforms and the means by which minors are  
17 able to access and use them exclusively. Defendants control how their Social Media Platforms are  
18 designed, developed and operated, and the targeted production, promotion, distribution, and  
19 marketing of their Social Media Platforms to attract and addict minors.

20 **B. For Years, the Strategic Partnership Enterprise Members Have**  
21 **Coordinated Acts to Ensure High Engagement Among Choctaw Nation**  
**Youth by Misrepresenting Platform Safety**

22 209. The Social Media Defendants' exploitation of and harm to children has been driven  
23 by their focus on increasing user engagement.

24 210. Each of the Social Media Defendants makes revenue through advertising dollars  
25 and, in order to increase that revenue, they must also increase the amount of time that individual  
26 users spend on the social media products.

27 211. Defendants collectively engaged in a years-long effort to hide from the public the  
28 effects of their social media products. Engineers and employees at each of Defendants' companies

1 knew about the risks and potential risks of addiction of the products, but did not disclose them.  
2 Instead, Defendants collectively and deliberately hid evidence of addiction and the negative  
3 impacts of the social media products, actively downplayed the risks the products posed to  
4 adolescents, or denied that the social media products had any negative impact on adolescents.

5 212. Nearly a decade of scientific and medical studies demonstrate that dangerous  
6 features engineered into Defendants’ platforms—particularly when used multiple hours a day –  
7 can have a “detrimental effect on the psychological health of [their] users,” including compulsive  
8 use, addiction, body dissatisfaction, anxiety, depression, and self-harming behaviors such as eating  
9 disorders.<sup>163</sup>

10 213. Each Social Media Defendant has long been aware of research connecting use of  
11 their platforms with harm to its users’ well-being but chose to intentionally suppress such  
12 information.

13 214. The following is a partial list of misrepresentations that Social Media Defendants  
14 have made, and continue to make, about the nature and safety of their respective Social Media  
15 Platforms:

16 **1. Meta’s Misleading and Deceptive Statements Regarding**  
17 **Platform Safety, the Targeting of Youth Users, and the Effects**  
**of Prolonged Engagement**

18 215. In the year leading up to Meta’s acquisition of Instagram, Meta publicly  
19 acknowledged its duty to children and worked to create false expectations about its platforms’  
20 safety. For example:

- 21 • Mark Zuckerberg: “So, *we’re really focused on, on safety, especially children’s safety.*  
22 *So we’re having folks under the age of 18. . . we just take a lot of extra precautions for*  
23 *it, to make sure that it’s just a safe environment for them. . . to use this service that you*  
24 *know, the default for, for people sharing things isn’t that they’re sharing with everyone*  
*but that they’re sharing with a smaller community. . . . We really try to build a safe*

25 <sup>163</sup> See, e.g., Fazida Karim *et al.*, *Social Media Use and Its Connection to Mental Health: A*  
26 *Systemic Review*, Cureus Volume 12(6) (June 15, 2020),  
27 <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7364393/>; Alexandra R. Lonergan *et al.*, *Protect*  
28 *me from my selfie: Examining the association between photo-based social media behaviors and*  
*self-reported eating disorders in adolescence*, *Int. J. of Eating Disorders* 756 (Apr. 7, 2020),  
<https://onlinelibrary.wiley.com/doi/epdf/10.1002/eat.23256>.

1 *environment. . . . That’s gonna be the key long term. . . . Right, and they, they feel like*  
 2 *Facebook is this really secure place* and that it’s a hundred percent safe, and . . . we’re  
 3 always thinking about little and big things like that that we can do to keep it safe for,  
 4 for the people who use our service.”<sup>164</sup> (emphasis added)

5 216. Following Meta’s acquisition of Instagram, high-ranking executives continued to  
 6 make public pronouncements about the safety of Meta’s platforms, including, but not limited to,  
 7 the following statements:

- 8 • Mark Zuckerberg: “Congressman, we have a number of measures in place to protect  
 9 minors specifically. We make it so that adults can’t contact minors who they. . . they  
 10 aren’t already friends with. We make it so that certain content that may be  
 11 inappropriate for minors, we don’t show.”<sup>165</sup>
- 12 • Mark Zuckerberg: “There are really two core principles at play here. There’s giving  
 13 people a voice, so that people can express their opinions. Then, there’s keeping the  
 14 community safe, which I think is really important.”<sup>166</sup>
- 15 • Mark Zuckerberg: “Looking ahead, we will continue to invest heavily in security  
 16 and privacy because we have a responsibility to keep people safe. But as I’ve said  
 17 on past calls, we’re investing so much in security that it will significantly impact  
 18 our profitability.”<sup>167</sup>
- 19 • Mark Zuckerberg: “[W]e have a responsibility to keep people safe on our  
 20 services.”<sup>168</sup>

*rules. Let’s start in these four areas*, Wash. Post (Mar. 30, 2019),

- 1 • Sheryl Sandberg: “[We] have to keep people safe and give them control over their  
2 experience on our apps. And we are.”<sup>169</sup>
- 3 • Sheryl Sandberg: “While we continue to invest in helping businesses, we are  
4 equally focused on keeping our platform safe.”<sup>170</sup>
- 5 • Mark Zuckerberg: “[W]e certainly do not design [Facebook] in that way [to be  
6 addictive].”<sup>171</sup>
- 7 • Meta: Answering that it was unable to “determine whether increased use of their  
8 platform among teenage girls has any correlation with increased signs of  
9 depression” and unable to “determine whether increased use of its platform among  
10 teenage girls has any correlation with increased signs of self-harm[.]”<sup>172</sup>
- 11 • Mark Zuckerberg: “I don’t believe [that Facebook harms children]. This is  
12 something that we study and we care a lot about; designing products that improve  
13 peoples’ well-being is very important to us. And what our products do is help people  
14 stay connected to people they care about, which I think is one of the most  
15 fundamental and important human things that we do, whether that’s for teens or for  
16 people who are older than that.”<sup>173</sup>

<https://www.washingtonpost.com/opinions/mark-zuckerbergthe-internet-needs-new-rules-lets-start-in-these-four-areas/2019/03/29/9e6f0504-521a-11e9-a3f7-78b7525a8d5f>.

- 1 • David Wehner, Chief Financial Officer of Meta: “[M]ore than anyone else in the  
2 industry, we invest on the safety and security side to sort of keep bad content off  
3 the site before it gets ranked and put into what people see. So we’ve got. . . over  
4 35,000 people on the safety and security side. We’ve got the most robust set of  
5 content policies out there. We do a quarterly call, public call around our content  
6 review process and procedures. So I think that on the front, before it even gets into  
7 the algorithm, I think we really do more than anyone else in the industry on the  
8 safety and security front to prevent things like misinformation and a bad content  
9 going into the system in the first place.”<sup>174</sup>
- Adam Mosseri, Head of Instagram: Dismissing concerns around Instagram’s  
negative impact on teens as “quite small,” even though the company conducted a  
thorough and deep dive into teen mental health.<sup>175</sup>
- Adam Mosseri: “I don’t believe that research suggests that our products are  
addictive.”<sup>176</sup>

10 217. In addition, Meta has launched advertising campaigns designed to encourage more  
11 children to use its platforms—by touting the purported safety of those platforms.  
12

13 218. As an example of advertising promoting use by children, a Meta 2021 online  
14 advertisement actively highlighted the posts available for fifth grade children on its Facebook  
15 platform, highlighting the experience of an art teacher who used Facebook to communicate with  
16 students during the pandemic—an experience the video noted was “a lot to unpack for little, tiny  
17 people.”

18 219. Meta’s misstatements came to a head when Frances Haugen, a former Facebook  
19 product manager, began publishing Meta’s internal documents that she leaked to *The Wall Street*  
20

25 *to Kids Looks Worse than Ever*, TechCrunch (Sept. 16, 2021),  
<https://techcrunch.com/2021/09/16/facebook-instagram-for-kids-mosseri-wsj-teen-girls/>.

26 <sup>176</sup> U.S. Senate Committee on Commerce, Science & Transportation, Hearing, Subcommittee:  
27 Protecting Kids Online: Facebook, Instagram, and Mental Health Harms (Sept. 30, 2021),  
[https://www.commerce.senate.gov/2021/9/protecting-kids-online-facebook-instagram-and-  
mental-health-harms](https://www.commerce.senate.gov/2021/9/protecting-kids-online-facebook-instagram-and-<br/>mental-health-harms).

1 *Journal*, which revealed alarming issues concerning the mental health effects that Facebook was  
2 having on teens.<sup>177</sup>

3 220. The documents are disturbing. They reveal that, according to Meta’s researchers,  
4 13.5% of U.K. girls reported more frequent suicidal thoughts, and 17% of teen girls reported  
5 worsening eating disorders after starting to use Instagram.<sup>178</sup> Over 40% of Instagram users who  
6 reported feeling “unattractive” said that feeling began while using Instagram,<sup>179</sup> and 32% of teen  
7 girls who already felt bad about their bodies felt even worse because of the app.<sup>180</sup>

8 221. Internal Meta presentations from 2019 and 2020 were transparent in their  
9 conclusions about the harms caused by Instagram: “We make body image issues worse for one  
10 in three teen girls.” “Mental health outcomes related to this can be severe.” “Aspects of Instagram  
11 exacerbate each other to create a perfect storm.”<sup>181</sup>

1           222. Yet, publicly, Meta only continues to hide the harms its platforms cause. On  
2 November 7, 2023, a second Meta whistleblower testified before a Senate subcommittee about the  
3 ways in which Meta has failed to act to protect its teenage users. Arturo Bejar, a former Facebook  
4 engineering director and Instagram consultant, testified that Meta leadership was aware of  
5 prevalent harms to its youngest users but declined to take adequate action in response. Bejar  
6 testified that he informed Chief Product Officer Chris Cox of research into platform harms to teens  
7 and that Cox acknowledged he was already aware of the statistics. Bejar found this response  
8 “heartbreaking because it meant that they knew it and they were not acting on it.”<sup>182</sup>

9                           **2. Snap’s Misleading and Deceptive Statements Regarding**  
10                           **Platform Safety, the Targeting of Youth Users, and the Effects**  
11                           **of Prolonged Engagement**

12           223. Snap’s Vice President of Global Public Policy, Jennifer Stout, stated in written  
13 testimony to a Senate Subcommittee that Snap takes “into account the unique sensitivities and  
14 considerations of minors when we design products”<sup>183</sup> when, in fact, Snap intentionally designed  
15 its platform to promote compulsive and excessive use and help underage users conceal information  
16 from their parents.

17           224. Snapchat’s Terms of Service state its services are not directed to children under the  
18 age of 13 and that users must “confirm” that they are 13 or older to create an account.<sup>184</sup> Snap’s  
19 Terms of Service outline the following safety measures relating to age-appropriate use: (1)  
20 “Registration requires a date of birth,” (2) Snap reports that “registration fails if a user is under the  
21 age of 13 years”; (3) “If Snap is made aware that a Snapchat user is under the age of 13 years by  
22 a user, a parent or law enforcement report, Snap terminates the account and deletes the user’s data”;

23 <sup>182</sup> Lauren Feiner, *Meta Failed to Act to Protect Teens, Second Whistleblower Testifies*, CNBC  
24 (Nov. 7, 2023), <https://www.cnbc.com/2023/11/07/meta-failed-to-act-to-protect-teens-secondwhistleblower-testifies.html>.

25 <sup>183</sup> Snap’s Senate Congressional Testimony—Our Approach to Safety, Privacy and Wellbeing  
26 (Oct. 26, 2021), <https://values.snap.com/news/senate-congressional-testimony-our-approach-to-safety-privacy-and-wellbeing?lang=en-US>.

27 <sup>184</sup> Snapchat Terms of Service, “Who can use the services,” <https://snap.com/en-US/terms>,  
28 (last visited Oct. 14, 2024).

1 (4) “Snap prevents a user ages 13 to 17 years old from updating their year of birth to an age over  
2 18 years.”

3 225. Snap and its executives repeatedly make statements intended to reassure users,  
4 advertisers paying to reach those users, and guardians that it is a safe product.

5 226. Snap has long known several pieces of information to be true: Snaps are incredibly  
6 addictive,<sup>185</sup> and that its platform is used by many, many teenagers.<sup>186</sup>

7 227. Snap has attempted to distance itself from other social media companies by  
8 suggesting that its product is less addictive than others. In 2024, it released an advertisement  
9 calling for “less social media,” and “more Snapchat.”

10 Finally, Snapchat claims that, unlike other apps, it doesn’t pressure users to  
11 endlessly scroll through content or waste time on the app. This is also  
12 completely false. The already-mentioned stories page contains a bottomless  
13 feed with an algorithm meant to pump out the content its users want.  
14 Snapchat was impressively lying, not just once, but twice here. The  
15 spotlight feature, released in 2020, provides yet another TikTok-like feed of  
16 short videos designed to keep its users on the app.<sup>187</sup>

17 228. In an early 2024 memo, Snap’s CEO Evan Spiegel touted, “We’re certainly far from  
18 perfect, but while our competitors are connecting pedophiles . . . we know that Snapchat makes  
19 people happy.”<sup>188</sup>

21 <sup>185</sup> See, e.g., Victor Luckerson, *How Snapchat Built its Most Addictive Feature*, Time (Sept.  
22 25, 2015), <https://time.com/4049026/snapchat-live-stories/>.

28 <https://www.entrepreneur.com/business-news/snapchat-ceo-evan-spiegel-social-media-is-dead-snap-is-not/468397>.

1 229. Snap’s executives touted the safety of its platform, and how its product was  
 2 designed to enhance the safety of minors.<sup>189</sup> However, Snap has done little—if anything—to  
 3 address how its ephemeral content-machine is addictive, prevents teens from “living in the  
 4 moment,” and leads to social isolation and mental health issues.

5 230. Snap’s platform, in truth, and as is well known to Snap, is in many ways more  
 6 harmful than other forms of social media, including by fostering negative mental health outcomes  
 7 among young people and because the product was manifestly designed to addict young people and  
 8 force them to repeatedly check the service in fear of “missing out” on Snap’s hallmark disappearing  
 9 content.

10 **3. Google’s Misleading and Deceptive Statements Regarding**  
 11 **Platform Safety, the Targeting of Youth Users, and the Effects**  
 12 **of Prolonged Engagement with YouTube**

13 231. Google knows that children and teenagers use YouTube in greater proportions than  
 14 older demographics. YouTube now ranks as the world’s most popular social media product for  
 15 minors. According to one recent report, more than 95% of children ages 13-17 have used  
 16 YouTube.<sup>190</sup> Nearly 20% of U.S. teens use YouTube almost constantly.<sup>191</sup> Among U.S. teenagers  
 17 who regularly use social media, 32% “wouldn’t want to live without” YouTube.<sup>192</sup>

18 232. YouTube’s age controls are defective (or non-existent, since registration is not  
 19 required to watch most videos). In addition, Google has developed and marketed a version of  
 20

21 <sup>189</sup> Snap’s Senate Congressional Testimony—Our Approach to Safety, Privacy and Wellbeing

1 YouTube, YouTube Kids, explicitly targeted at children under 13. Google developed this product  
2 to encourage early—and therefore lasting—adoption of YouTube by children.

3 233. Google knows that a robust and committed base of young users is key to  
4 maximizing advertising revenue. Indeed, it has aggressively touted its hold on child users to  
5 advertisers. In 2014, for example, Google pitched its YouTube product to Hasbro, a popular toy  
6 manufacturer, and specifically boasted of the product’s immense popularity among children,  
7 noting that it was “unanimously voted as the favorite website of kids 2-12” and that “93% of  
8 tweens” use the product.<sup>193</sup>

9 234. Google leveraged YouTube’s popularity among children with toy manufacturers to  
10 convince companies to display advertisements on its website. And for good reason: Google collects  
11 troves of data on children in order to display the most relevant advertisements to them. The longer  
12 Google can hold children’s attention, the more data it can collect, and the more targeted  
13 advertisements it can display to children. Google’s revenue machine has been so effective that in  
14 2023, YouTube’s global advertising revenues surpassed \$31 billion.<sup>194</sup>

15 235. Google has boasted that YouTube is “today’s leader in reaching children ages 6-  
16 11,” “the new Saturday Morning Cartoons,” and “unanimously voted as the favorite website of  
17 kids 2-12.”<sup>195</sup>

27 <sup>195</sup> Complaint for Permanent Injunction, Civil Penalties, and Other Equitable Relief, *FTC v.*  
28 *Google LLC et al.*, No. 1-19-cv-02642-BAH, at 3,12, and 6-7 (D.D.C. Sept. 4, 2019) Dkt. No. 1-  
1. [https://www.ftc.gov/system/files/documents/cases/youtube\\_complaint\\_exhibits.pdf](https://www.ftc.gov/system/files/documents/cases/youtube_complaint_exhibits.pdf).

1           236. With Google’s hypnotic ability to attract and hold rapt the attention of youth, child  
2 safety is paramount. Google maintains that YouTube is a safe place for children, stating that its  
3 guidelines prohibit images, videos, and comments that put children at risk, it places age restrictions  
4 on videos, and that customers will not encounter violent or dangerous content on the platform  
5 through various terms.

6           237. Google intentionally downplayed the dangers that children faced using their  
7 platform—both from an addiction standpoint and from the dangerous content that children were  
8 exposed to on the website—by comparing YouTube to “more like a library.”<sup>196</sup>

9           238. Google has also represented that it “added a measure of ‘social responsibility’ to its  
10 recommendation algorithm” to ensure that “engagement” was not prioritized by promoting  
11 offensive or violent videos.<sup>197</sup>

12           239. Leslie Miller, Vice President, YouTube Government Affairs & Public Policy, even  
13 represented in 2021 that Google had hired teams of “experts who come from child development,  
14 child psychology and children’s media backgrounds. They work closely with the product teams to  
15 ensure that product design reflects an understanding of children’s unique needs and abilities and  
16 how they evolve over time. [They] also work extensively with external experts in online safety,  
17 content quality, mental health, trauma, digital literacy and child development; this collaboration is  
18 essential to ensure we have the best information and evidence available to address new and  
19 emerging challenges kids may face online.”<sup>198</sup>

20           240. Google was warned—numerous times by its employees and/or users—that it  
21 created an “addiction machine” through its algorithm of promoting more and more outrageous  
22

23 \_\_\_\_\_  
24 <sup>196</sup> Mark Bergen, *YouTube executives ignored warnings, letting toxic videos run rampant*,  
25 Denver Post (Apr. 6, 2019), <https://www.denverpost.com/2019/04/06/youtube-rules-conspiracy-theories-misinformation/>.

26 <sup>197</sup> *Id.*

27 <sup>198</sup> See Leslie Miller, VP Government Affairs & Public Policy, YouTube—  
28 WorldPressFreedomDay Conference 2021, <https://youtu.be/9CY-iWe99Ac?si=uSTxtVknjj7Adls6>.

1 videos. But instead of addressing the problem, it made it worse: creating a new algorithm that  
2 promoted videos that achieved popularity by outrage.<sup>199</sup>

3 241. Google also proactively dissuaded staff from being proactive, discouraging them  
4 from engaging in any form of content moderation to protect individuals from seeing offensive  
5 content.<sup>200</sup>

6 242. Google has been warned by lawmakers that its product is addictive, as well. The  
7 Congressional Subcommittee on Economic and Consumer Policy wrote the following in its request  
8 for information about the YouTube Kids program:

9 We also are concerned by the amount of time children are spending on your  
10 platform. YouTube Kids continues to utilize recommendation algorithms  
11 “based on watch and search history.” And unlike on traditional YouTube,  
12 YouTube Kids auto-plays new videos without warning, with no option to  
13 turn off the feature. This places the onus on the child to stop their viewing  
14 activity, rather than providing a natural break or end point. Without that  
15 natural stopping point, children are likely to continue watching for long  
16 periods of time. The optional timer tool on your platform can be helpful but  
17 is not a substitute for addressing the underlying reasons children are drawn  
18 to stay on your platform for long periods of time, including auto-play.

19 Studies have shown that too much screen time for preschool-aged children  
20 can lead to damage in the regions of the brain related to literacy, language  
21 processing, and speech. AAP found that children spend a shocking average  
22 of seven hours per day on entertainment media. By contrast, the American  
23 Academy of Child & Adolescent Psychiatry recommends that parents,  
24 “limit non-educational screen time to about 1 hour per weekday and 3 hours  
25 on the weekend days.” In addition to the threat of harm to children’s  
26 development, too much screen time can cause sleep problems, mental health  
27 issues, and obesity in children and young adults. YouTube Kids’ potentially  
28 addictive qualities also appear to be interfering with the regular course of  
education, especially during the pandemic. From 2019 to 2020, as YouTube  
usage increased 22%, one-third of parents reported that their children are  
distracted from remote learning by YouTube and apps like it.

As many parents know, YouTube Kids can be a useful tool to pacify and  
entertain children—and, we wish, to educate. However, YouTube appears  
to be exploiting children by serving them a non-stop stream of low-quality,

---

27 <sup>199</sup> *Id.*

28 <sup>200</sup> *Id.*

1 commercial content. More must be done to protect children from exposure  
2 to marketing and too much screen time.<sup>201</sup>

3 243. YouTube’s addiction machine uses algorithmic modeling to push more and more  
4 extreme videos upon children, who become fixated upon the outrageous content. Children are then  
5 fed an endless stream of videos showing violence, sexualized content, and dangerous “challenge”  
6 videos,<sup>202</sup> all which harm youth and cause them to use the product excessively.

7 244. Google has known of these harms, but has purposefully turned a blind eye to them,  
8 instead focusing parents on vague terms and conditions and newer, performative efforts to use  
9 artificial intelligence to remove content depicting harm. These efforts, however, do not address the  
10 problem. YouTube omits from its representations to consumers the fact that the burden is actually  
11 placed on the consumer—and often on the families of victims of violence—to police and secure  
12 the removal of violent or dangerous content on the platform. “In the rush to expand its advertising  
13 empire to preschoolers, Google has made promises about the content on YouTube Kids that it is  
14 incapable of keeping,” said Josh Golin, Associate Director of Campaign for a Commercial-Free  
15 Childhood. “As a parent, I was shocked to discover that an app that Google claims is safe for young  
16 children to explore includes so much inappropriate content from the Wild West of YouTube.”<sup>203</sup>

17 245. Google prioritized increasing engagement over children’s safety, and turned a blind  
18 eye when it received warnings about how its addicting product was harming children, even  
19

1 suppressing information and instead directing the public toward initiatives that did little to help  
2 children, but which were actually designed so as to not hurt earnings and maintain the status quo.

3 **4. TikTok’s Misleading and Deceptive Statements and**  
4 **Announcements Regarding Platform Safety, the Targeting of**  
5 **Youth Users, and the Effects of Prolonged Engagement**

6 246. TikTok continually misrepresents its platform as “safe,” “appropriate for children  
7 and teenagers,” and that safety is its “top priority.” It also misrepresents the effectiveness of built-  
8 in features designed to combat addictive use and harms, including parental controls, community  
9 standards, and age verification.<sup>204</sup> TikTok further misrepresents the extent to which the platform  
10 is directed to children under 13 years old.

11 247. Despite knowing that TikTok is harmful to and inappropriate for young users,  
12 TikTok represents that the platform is “safe,” “appropriate for children and teenagers,” and that  
13 safety is its “top priority.”

14 248. On TikTok’s website, it falsely represents:

15 • “We care deeply about your well-being and seek to be a source of happiness,  
16 enrichment, and belonging. . . . We work to make sure this occurs in a supportive space that does  
17 not negatively impact your physical or psychological health.”<sup>205</sup>

18 • “Creating a welcoming environment where everyone feels safe and comfortable is  
19 our highest priority.”<sup>206</sup>

28

1           • “We are deeply committed to TikTok being a safe and positive experience for  
2 people under the age of 18 . . . .” It goes onto say “We do not allow content that may put young  
3 people at risk of psychological, physical, or developmental harm.”<sup>207</sup>

4           • “We have a vibrant and inspiring community on TikTok, and it’s important that our  
5 platform remains a safe, supportive, and joyful place for our community.”<sup>208</sup>

6           249. Additionally, the Chief Executive Officer of TikTok, Shou Chew, has publicly made  
7 the following misrepresentative statements:

8           • On March 23, 2023, CEO Shou Chew, who previously explained that he is  
9 “responsible for all the strategic decisions at TikTok,” stated in written testimony before the U.S.  
10 House Committee on Energy and Commerce that “Safety and wellness—in particular for teens—  
11 is a core priority for TikTok.”<sup>209</sup>

12           • Shou Chew’s written testimony also included the following promise: “**1) We will**  
13 **keep safety—particularly for teenagers—a top priority for us;**”<sup>210</sup> (emphasis in original)

14           • During an April 2023 Ted Talk, “*TikTok's CEO on its future—and what makes its*  
15 *algorithm different,*” which has over 3.2 million views, Shou Chew referred to his aforementioned  
16 written testimony before Congress, reiterating his commitment “that we take safety, especially for  
17 teenagers, extremely seriously, and we will continue to prioritize that.” He went on to say, “[y]ou  
18 know, I believe that [we] need to give our teenage users, and our users in general, a very safe  
19  
20

25 *policies* (Oct. 17, 2022), <https://newsroom.tiktok.com/en-us/enhancing-the-live-community-experience>.

26 <sup>209</sup> Written Statement of Testimony of Show Chew, U.S. House Committee on Energy and  
27 Commerce (Mar. 23, 2023), <https://docs.house.gov/meetings/IF/IF00/20230323/115519/HHRG-118-IF00-Wstate-ChewS-20230323.pdf>.

28 <sup>210</sup> *Id.*

1 experience . . . . If they don't feel safe, we cannot fulfill our mission. So, it's all very organic to  
2 me as a business to make sure that I do that.”<sup>211</sup>

3 250. TikTok Executives have also misrepresented TikTok's intentional and extensive  
4 efforts to encourage addiction to its platform through the development of compulsive design  
5 elements. For example:

6 • When asked by Congress if TikTok is specifically designed to keep users engaged  
7 as long as possible, TikTok's Vice President and Head of Public Policy, Michael Beckerman,  
8 testified: “We want to make sure that people are having an entertaining experience, you know like  
9 TV or movies, TikTok is meant to be entertaining. But we do think we have a responsibility, along  
10 with parents, to make sure that it's being used in a responsible way.”<sup>212</sup>

11 • In the aforementioned April 2023 Ted Talk, Shou Chew reiterated that TikTok's  
12 “goal is not to optimize and maximize time spent. It is not.” He then denied that TikTok has a  
13 financial incentive to maximize users' time spent on the platform, stating: “Even if you think about  
14 it from a commercial point of view, it is always best when your customers have a very healthy  
15 relationship with your product. . . .”<sup>213</sup>

16 251. Following media reports describing the tragic death of children who had died of  
17 asphyxiation while trying to complete the “Blackout Challenge” posted on TikTok, TikTok  
18 released an official response which included the following statement: “At TikTok, we have no  
19 higher priority than protecting the safety of our community, and content that promotes or glorifies  
20

21 \_\_\_\_\_  
22 <sup>211</sup> *TikTok's CEO on its future—and what makes its algorithm different*, TED (Apr. 21, 2023),  
23 [https://www.ted.com/talks/shou\\_chew\\_tiktok\\_s\\_ceo\\_on\\_its\\_future\\_and\\_what\\_makes\\_its\\_algorithm\\_different/transcript?subtitle=en](https://www.ted.com/talks/shou_chew_tiktok_s_ceo_on_its_future_and_what_makes_its_algorithm_different/transcript?subtitle=en).

24 <sup>212</sup> Testimony of Michael Beckerman, U.S. Senate Committee on Commerce, Science &  
25 Transportation, Subcommittee on Consumer Protection, Product Safety, and Data Security:  
26 Hearing, Protecting Kids Online: Snapchat, TikTok, and YouTube (Oct. 26, 2021),  
<https://www.commerce.senate.gov/services/files/8C751FF4-A1FD-4FCA-80F6-C84BEB04C2F9>.

27 <sup>213</sup> *TikTok's CEO on its future—and what makes its algorithm different*, TED (Apr. 21, 2023),  
28 [https://www.ted.com/talks/shou\\_chew\\_tiktok\\_s\\_ceo\\_on\\_its\\_future\\_and\\_what\\_makes\\_its\\_algorithm\\_different/transcript?subtitle=en](https://www.ted.com/talks/shou_chew_tiktok_s_ceo_on_its_future_and_what_makes_its_algorithm_different/transcript?subtitle=en).

1 dangerous behavior is strictly prohibited and promptly removed to prevent it from becoming a  
2 trend on our platform.”<sup>214</sup>

3 252. By engaging in these similar misrepresentations, and by failing to disclose critical,  
4 material information regarding its platform’s risks, TikTok deceives users, regulators, and the  
5 public at large. TikTok’s deception and lack of transparency prevents young users and their  
6 guardians from making truly informed decisions about platform usage.

7 253. While uniformly hiding the negative impacts of their products on adolescents, each  
8 of the Social Media Defendants have simultaneously adopted successful engagement techniques  
9 from each other, leading to a convergence in the features that make the platforms addictive to  
10 young users. This includes the collective adoption of algorithmic features such as infinite scrolling,  
11 autoplay, and personalized feeds that are now standard across social media platforms. It also  
12 includes the collective adoption of reward mechanisms such as likes, streaks, and other features  
13 that encourages young users to continually and consistently check their platforms. These features,  
14 which are collectively adopted by all Defendants, are effective at engaging younger users who are  
15 more vulnerable to social validation mechanisms and, as a result, they are now ubiquitous among  
16 the social media platforms.

17 254. Further, each of the Social Media Defendants consistently benchmarks its  
18 respective platform’s performance and user engagement metrics in reference to the performance  
19 of the other platforms. This indirect collaboration leads to further adoption of uniform addictive  
20 design choices across platforms, including using engagement and attention metrics as key  
21 measures, such as time spent and click-through rates.

22 255. Defendants also collectively participate in trade associations and industry  
23 organizations to protect their shared interests. Defendants and their agents aggressively lobby  
24 against regulation that threatens their collective ability to employ addictive features on their  
25

26 \_\_\_\_\_  
27 <sup>214</sup> Matthew Impelli, *TikTok Blackout Choking Challenge Leads to 12-Year-Old Boy*  
28 *Becoming Brain Dead*, Newsweek (Mar. 30, 2021), <https://www.newsweek.com/tiktok-blackout-choking-challenge-leads-12-year-old-boy-becoming-brain-dead-1579927>.

1 platforms. The Defendants’ relationships with these organizations allows for the uniform  
2 implementation of user engagement and platform design strategies across companies.

3 256. Additionally, Defendants also collaborate through data sharing arrangements in  
4 certain contexts, such as through advertising partnerships, which lead to more targeted and  
5 personalized content shown to adolescents on their platforms.

6 257. For example, the screen grab below shows that all four Social Media Defendants  
7 co-sponsored Advertising Week’s 2024 New York event as top-tier donors.<sup>215</sup>

19 258. Advertising Week New York promotional materials state that it features numerous  
20 special events that provide a fun and engaging way for attendees to network, connect and exchange  
21 ideas. Meta, TikTok, Snap, and Google all were scheduled to have multiple speakers present  
22 throughout the week.<sup>216</sup>

23

1           259. Additionally, all Social Media Defendants are members of the Interactive  
2 Advertising Bureau (IAB), an organization created to empower the media and marketing industries  
3 to thrive in the digital economy. IAB’s membership cohort is comprised of more than 700 leading  
4 media companies, brands, agencies, and technology firms responsible for selling, delivering, and  
5 optimizing digital ad marketing campaigns. IAB advertises the following benefits of membership.  
6 Members can: (1) participate with interactive leaders in shaping the industry; (2) collaborate with  
7 peers to establish guidelines, standards, and best practices; (3) drive industry research; (4) protect  
8 your business interests by helping steer IAB public policy efforts; (5) power growth of the  
9 interactive industry, and (6) improve your organization’s operational efficiency.<sup>217</sup>

10           260. IAB Board of Directors include: Patrick Harris, President of Americas at Snap Inc.;  
11 Alvin Bowles, Vice President, Global Business Group, Americas at Meta; and Jason Spero, Vice  
12 President, Global Product Lead at Google.<sup>218</sup>

13           261. IAB’s Measurement, Addressability, & Data Center (“MAD”) specializes in  
14 measurement and attribution, addressability, advances in retail media, and privacy changes,  
15 providing a comprehensive approach to digital media challenges. Board members set the agenda  
16 and direction for IAB and the industry; approve and prioritize key initiatives; influence industry  
17 best practices; receive priority access to IAB experts, research, and tools; and participate in  
18 exclusive events and meetings. Google, Meta, and TikTok are listed as MAD Board Member  
19 Organizations.<sup>219</sup> The IAB Attention Task Force focuses on enhancing how attention is measured  
20 and understood within advertising and marketing. The Task Force aims to create a standardized  
21 framework, develop metrics for broad use, and establish a common industry language. Importantly,

and
- 3 • *TikTok*, Susan Zemlyakova, Global Product Marketing and Strategy, Measurement.

4 264. Another example of formal collaboration among the Social Media Defendants is  
5 through the Association of National Advertisers (“ANA”) and its Growth Agenda and exclusive  
6 network.

7 265. The ANA is the U.S. advertising industry's oldest and largest trade association.  
8 Originally known as the Association of National Advertising Managers, it was established to  
9 promote cooperative relationships between regional and national advertising industries,  
10 manufacturers and dealers, and advertisers and agencies.<sup>222</sup>

11 266. ANA’s mission is to drive growth for marketing professionals, for brands and  
12 businesses, and for the industry. Growth is foundational for all participants in the ecosystem. The  
13 ANA seeks to align those interests by leveraging the 12-point ANA Growth Agenda, which has  
14 been endorsed and embraced by the ANA Board of Directors and the Global CMO Growth  
15 Council.<sup>223</sup>

16 267. ANA partnership programs “allow a limited number of companies access,  
17 involvement, and networking with various ANA member touchpoints including national industry  
18 conferences, 1-Day Conferences, committee meetings, webinars, e-newsletters and more.”<sup>224</sup> ANA  
19 states that its “partner programs also allow us [ANA] to expand our products and services,  
20 intellectual capital, and the geographic reach of the association.”<sup>225</sup>

21  
22 <sup>222</sup> ANA, 2024 Media Conference (Mar. 18-20, 2024),

28 <sup>225</sup> *Id.*

1 268. ANA’s Strategic Partnership Program is the association’s “most exclusive  
2 sponsorship level” and provides the thirteen enrolled Strategic Partners with “year-round access,  
3 speaking engagements, and networking across various ANA member touchpoints, including  
4 national industry conferences, the Masters of Marketing annual conference, virtual and member  
5 only one-day conferences, committee meetings, webinars, email newsletters, and more.”<sup>226</sup>

6 269. TikTok, Google, and Meta are exclusive Strategic Partners of the ANA.<sup>227</sup> Snap  
7 participates, along with the other Social Media Defendants, through membership positions within  
8 ANA’s committees, such as the “Influencer Marketing Committee, Midwest Chapter.”<sup>228</sup> All four  
9 Social Media Defendants are ANA Marketing Solutions Provider Members.<sup>229</sup>

10 270. The ANA 2024 Media Conference vignette specifically provides that the  
11 conference will address the industry’s most pressing media topics and issues, notably “cross-media  
12 measurement” and “attention metrics[.]”<sup>230</sup>

13 271. TikTok was the Presenting sponsor for the July 2024 ANA Digital & Social Media  
14 Conference in Los Angeles, California. The agenda included TikTok’s presentation titled  
15 “Engaging Gen Z On Social’s Hottest Platform” in which attendee learned “best practices for  
16 keeping audiences captivated on the platform and how TikTok is partnering with brands to drive  
17 engagement.”<sup>231</sup>

LUNCH SESSION: FANDOMS ARE SHAPING MAINSTREAM POP CULTURE: HERE'S HOW BRANDS CAN KEEP UP.

We're seeing a fundamental shift in video culture. Today, 85% of people describe themselves as a fan of someone or something. As more people become engaged and AI tools make creation easier, fans have moved from being consumers of culture to directly shaping it. YouTube is at the center of this shift, as a platform where viewers deeply engage with things they're fans of, find new fandoms, and express their own creativity. How do brands stay ahead of these shifts?

Join Madeline Buxton, YouTube Culture and Trends Manager, as she shares insights from the YouTube Culture and Trends Report and helps marketers understand the biggest shifts in culture right now and how they can leverage these new dynamics.

**Madeline Buxton**  
YouTube Culture & Trends Manager  
Google

**C. Social Media Defendants Engaged In, and Continue to Engage In, Racketeering by Violating the Criminal Federal Wire Fraud Statute Numerous of Times Incident to Their Scheme to Defraud**

277. The Social Media Defendants willfully or knowingly conducted or participated in, directly or indirectly, the affairs of the Strategic Partnership Enterprise through a pattern of racketeering activity within the meaning of 18 U.S.C. §§1961(1), 1961(5) and 1962(c), and systematically and continuously employed the use of wire facilities, in violation of 18 U.S.C. §1343.

278. Specifically, the Social Media Defendants—individually and collectively—have committed, conspired to commit, and/or aided and abetted in the commission of, at least two predicate acts of racketeering activity (*i.e.*, violations of 18 U.S.C. §1343), within the past ten years, as described herein.

279. The Strategic Partnership Enterprise’s scheme to defraud could not have been executed without each Social Media Defendant, its subsidiaries, and its executives using their separate legal incorporation to facilitate racketeering activity.

280. The multiple acts of racketeering activity that the Social Media Defendants committed, or aided or abetted in the commission of, were related to each other, pose a threat of continued racketeering activity, and therefore constitute a “pattern of racketeering activity.”

281. By intentionally targeting youth users and concealing the known risks regarding the safety of their social media platforms to guardians, youth, federal, state and local governments,

1 and the public at large, including the Choctaw Nation, the Social Media Defendants engaged in a  
2 fraudulent and unlawful course of conduct constituting a pattern of racketeering activity.

3 282. The Social Media Defendants used, directed the use of, and/or caused to be used,  
4 numerous interstate and foreign wire communications in service of the Strategic Partnership  
5 Enterprise's objectives through transmitting common misrepresentations, concealments, and  
6 material omissions.

7 283. The Social Media Defendants committed these racketeering acts intentionally and  
8 knowingly, with the specific intent to defraud and to personally or directly profit from these  
9 actions. The Social Media Defendants' predicate acts of racketeering (18 U.S.C. §1961(1)) include,  
10 but are not limited to wire fraud, violations of 18 U.S.C. §1343, by transmitting and/or receiving,  
11 or by causing to be transmitted and/or received, fraudulent materials by wire for the purpose of  
12 deceiving the public, members of the Choctaw Nation, the Choctaw Nation's government, U.S.  
13 regulators, and Congress.

14 284. The pattern of racketeering activity conducted by the Social Media Defendants  
15 involved numerous, coordinated separate instances of the use of interstate and/or foreign wire  
16 facilities in furtherance of the unlawful Strategic Partnership Enterprise, including materially  
17 uniform concealments and material omissions in statements regarding the material safety risks of  
18 their social media platforms, with the goal of collectively profiting from increased advertising  
19 revenues due to maximizing the engagement from youth users, including Choctaw Nation's youth  
20 members, induced by the reliance on the Social Media Defendants' omissions and  
21 misrepresentations.

22 285. As thoroughly described above, the Social Media Defendants devised and  
23 knowingly carried out material schemes and/or artifices to defraud young users and their  
24 guardians, the Choctaw Nation's government, U.S. regulators, and Congress by: (1) transmitting  
25 marketing materials and privacy statements that fraudulently and deceptively omitted any  
26 reference to the known risks to youth users who engage on their platforms; (2) posting false and  
27 misleading statements, including intentional misrepresentations and omissions, regarding the  
28 safety of the platforms that Social Media Defendants had a duty to disclose on their respective

1 websites; and (3) transmitting written statements and televised testimony directed to Congress and  
2 the public at large that concealed the safety risks of platforms and that deliberately suppressed  
3 internal research findings showing the harmful effects social media platforms have on young users.

4 286. Each of these fraudulent interstate and/or foreign wire transmissions constitutes  
5 racketeering activity and collectively, these violations constitute a pattern of racketeering activity,  
6 through which the Social Media Defendants defrauded and intended to defraud the public,  
7 including the Choctaw Nation's youth and their guardians, in order to maximize advertising  
8 revenues.

9 287. The Social Media Defendants devised and knowingly carried out an illegal scheme  
10 and artifice to defraud by means of materially false or fraudulent pretenses and omissions of  
11 material facts regarding the safety risks of their social media platforms on young users. The Social  
12 Media Defendants as members the Strategic Partnership Enterprise knew that the weight of  
13 contemporaneous scientific evidence established the existence of the safety risk to young users  
14 and that this risk was material. They acted with reckless disregard in their statements to guardians,  
15 the Choctaw Nation's youth, and the public at large, wherein they omitted the material safety risks.  
16 The Social Media Defendants intended that that their common purpose and scheme to defraud  
17 would, and did, use the interstate wire facilities, intentionally and knowingly with the specific  
18 intent to advance, and for the purpose of executing, their illegal scheme.

19 288. The Social Media Defendants, by transmitting or receiving, or causing to be  
20 transmitted or received, materials via wire for the purpose of executing the scheme to defraud the  
21 Choctaw Nation's youth and their guardians to increase and sustain youth engagement on their  
22 respective platforms and thus increase advertising revenue, which amounts to a material scheme  
23 to defraud and to obtain money on false pretenses, misrepresentations, promises, and/or omissions.

24 289. The Social Media Defendants' use of interstate and/or foreign wires to perpetrate  
25 the scheme involved numerous communications, publications, representations, statements, and  
26 electronic transmissions. Illustrative and non-exhaustive examples of the Strategic Partnership  
27 Enterprise's violations of the criminal federal wire fraud statute, 18 U.S.C. §1343, include the  
28 following aforementioned instances:

1 (a) Written and recorded testimonial statements presented during the Tuesday,  
2 October 26, 2021, congressional hearing titled “Protecting Kids Online: Snapchat, TikTok, and  
3 YouTube” in which Social Media Defendants’ executives collectively misrepresented the safety  
4 of their respective platforms and concealed the intentional targeting of children to maximize  
5 engagement, thereby preventing the public, including the Choctaw Nation, from learning the truth;

6 (b) Marketing materials, privacy policies, and press releases regarding Social  
7 Media Defendants’ respective platforms, and their corresponding risks and benefits, which the  
8 Social Media Defendants transmitted through the internet and television, that include intentional  
9 misrepresentations and omissions regarding the safety of their respective platforms that Social  
10 Media Defendants had a duty to disclose;

11 (c) Written statements and televised testimony directed to Congress that  
12 concealed the safety risks of the Social Media Defendants’ respective platforms and that  
13 deliberately suppressed internal research findings showing the harmful effects social media  
14 platforms have on young users;

15 (d) Communications and statements directed to the public at large that  
16 fraudulently misrepresented the known risks associated with prolonged engagement and the  
17 deliberate suppression of internal research showing social media platforms’ harmful effects on  
18 young users, and Written communications and internal e-mails regarding the Social Media  
19 Defendants’ misrepresentations, marketing statements, and claims about targeting youth users,  
20 optimizing attention metrics, and the harmful effects on young users generally.

21 **VII. THE DEFENDANT-INDUCED YOUTH MENTAL HEALTH CRISIS**  
22 **CAUSES SIGNIFICANT DISRUPTION AND HARM TO THE CHOCTAW**  
**NATION COMMUNITY AND ITS SOCIAL SERVICE SYSTEMS**

23 **A. Young Members of the Choctaw Nation Are Addicted to Defendants’**  
24 **Social Media Platforms and Suffer Harm as a Result of Their Use**

25 290. Native youth (ages 10-24) are frequent users of social media, with nearly all  
26 maintaining accounts, similar to their non-Native peers.<sup>236</sup>

27 <sup>236</sup> Jesse Gritton, MPH, et al., *Responding to Concerning Posts on Social Media: Insights and*  
28 *Solutions from American Indian and Alaska Native Youth* at 64, Ctrs. for American Indian and

1 291. A study on Native youth found that all adolescent focus-group participants used  
2 social media at least once daily, with most reporting multiple interactions throughout the day.<sup>237</sup>  
3 The most commonly used platforms among participants were Facebook, Instagram, and  
4 Snapchat.<sup>238</sup>

5 292. Consistent with national research, members of the Choctaw community report that  
6 many Choctaw youth regularly engage with Defendant’s Social Media Platforms and suffer  
7 harmful effects, including increased delinquency and behavioral issues at home and in school.  
8 Youth frequently struggle with time management and impulse control related to social media use,  
9 while also experiencing heightened fear and anxiety over how they are portrayed by their peers on  
10 social media.<sup>239</sup>

11 293. The Nation has seen a sharp rise in youth experiencing anxiety, depression, and  
12 suicidal ideation linked to Defendant’s Social Media Platforms—impacting individuals, families,  
13 and the broader community.

14 **B. Defendants’ Social Media Platforms Exacerbate Suicide Contagion**

15 294. Native youth are disproportionately affected by high rates of suicide and depression.  
16 Among those aged 14-18, the prevalence of suicidal thoughts, planning, and attempts has risen  
17 nearly 15% since in 2017. Tribes today live with the devastating reality that suicide is the second  
18 leading cause of death for Native youths aged 10-24 years, a rate that is 2.5 times higher than the  
19 national average.<sup>240</sup>

27 (May 2024), <https://www.choctawnation.com/biskinik/health/mental-health-continues-to-be-a-top-priority-for-choctaw-nation/>.

28 <sup>240</sup> Kerr et al., *supra* note 246.

1           295. Tribal Leadership recognizes the heightened vulnerability of Native youth to  
2 suicide contagion and cluster formation and has identified Social Media Platforms as a powerful  
3 vector for the spread of this public health crisis.

4           296. A 2017 report from the U.S. Department of Health and Human Services (“HHS”)  
5 warned that Native “[a]dolescents and young adults, who—in some tribes—have alarmingly high  
6 suicide rates, are at greater risk for suicide contagion and cluster formation than other age  
7 demographics.”<sup>241</sup> The report further cautioned that Defendants’ Social Media Products are  
8 potential triggers for suicide cluster contagion because they “significantly increase the size of a  
9 potential victim’s circle of influence. This creates the capacity for broader, faster, and more  
10 extensive spread of suicide stories and rumors.”<sup>242</sup>

11           297. In 2024, HHS issued another report emphasizing the risks posed by social media in  
12 responding to suicide clusters. While these platforms can serve as public outreach tools, they also  
13 facilitate the rapid spread of misinformation and increase the likelihood of suicide contagion.<sup>243</sup>  
14 “Social media can serve as an unwelcome early notification system of a suicide or suicide cluster.  
15 The speed at which information travels via social media can prompt the spread of misinformation  
16 among community members and contagion among vulnerable persons. As a result, community  
17 leaders often are left to deal with the traumatic aftermath of many persons having to first learn of  
18 a loved one’s death by suicide online.”<sup>244</sup>

19           298. Emerging research continues to highlight the connection between social media  
20 exposure and suicide contagion. A 2021 study in Ohio found that students in grades 7-12 were at  
21 increased risk of suicidal ideation and attempts during a 2017-2018 suicide cluster due to exposure

1 to related content on social media.<sup>245</sup> The study recommended proactive interventions to mitigate  
2 these harmful effects.

3 299. In response to this growing crisis, the Nation has faced escalating costs in its suicide  
4 prevention programs as it works to protect and support at-risk youth.

5 **C. The Choctaw Nation is Expending Significant Resources to Address**  
6 **the Youth Mental Health Crisis**

7 300. Effectively addressing the youth mental health crisis demands the collective efforts  
8 of the entire Choctaw community and its social services programs. These efforts strain already  
9 limited resources, making it increasingly difficult for the Nation to deliver essential social services.

10 301. The Nation needs more resources to: hire additional personnel, including  
11 counselors and medical professionals to address mental, emotional, and social health issues;  
12 develop additional resources to address mental, emotional, and social health issues; increase  
13 training for Tribal leaders and members to identify youth exhibiting mental, emotional, and social  
14 distress; educate Tribal leaders and members about the harms caused by Defendants' wrongful  
15 conduct; and develop lesson plans to teach youth about the dangers of using Defendants' Social  
16 Media Platforms.

17 302. The Nation alone cannot fully address the youth mental health crisis affecting its  
18 communities. Effectively mitigating the harm caused by Defendants' actions requires a  
19 comprehensive approach. Without the necessary resources to implement critical interventions, the  
20 Nation will continue to bear the lasting consequences of Defendants' conduct.

21 303. The Defendants' actions and omissions have significantly and unjustifiably  
22 disrupted the Nation's functions and operations, posing substantial harm to the public health,  
23 safety, and overall welfare of the Nation's community.

1 **VIII. CAUSES OF ACTION**

2 **FIRST CLAIM FOR RELIEF**  
3 **Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C. §1962(c)**  
4 **Strategic Partnership Enterprise**  
5 **(Brought by Plaintiff Against All Defendants)**

6 304. The Choctaw Nation repeats and realleges ¶¶1-303, as if fully alleged herein.

7 305. This claim is brought by the Choctaw Nation against the Social Media Defendants  
8 for actual damages, treble damages, and available injunctive and/or equitable relief under 18.  
9 U.S.C. §1964, for violations of 18 U.S.C. §§1961, *et seq.* (“RICO statute”), specifically, 18 U.S.C.  
10 §1962(c).

11 306. 18 U.S.C. §1962(c) provides, in relevant part:

12 It shall be unlawful for any person employed by or associated with any  
13 enterprise engaged in, or the activities of which affect, interstate or foreign  
14 commerce, to conduct or participate, directly or indirectly, in the conduct of  
15 such enterprise’s affairs through a pattern of racketeering activity . . .

16 307. At all relevant times, each of the Social Media Defendants were and are “persons”  
17 for purposes of the RICO statute, 18 U.S.C. §§1961, *et seq.*, because each Social Media Defendant  
18 is an entity capable of holding, and does hold, “a legal or beneficial interest in property[.]” *See* 18  
19 U.S.C. §1961(3).

20 308. The Choctaw Nation is a “person,” as defined under 18 U.S.C. §1961(3), and has  
21 standing to sue under 18 U.S.C. §1964(c) as it was and is injured in its business and/or property  
22 “by reason of” the RICO Act violations described herein. because each Social Media Defendant is  
23 an entity capable of holding, and does hold, “a legal or beneficial interest in property[.]” *See* 18  
24 U.S.C. §1961(3).

25 309. As set forth above, the Social Media Defendants together formed an association-  
26 in-fact enterprise—namely, the Strategic Partnership Enterprise—for the purpose of creating,  
27 maintaining, and distributing addictive platforms and profiting from the resulting increased  
28 advertising revenue due to the maximization of user engagement. The Strategic Partnership  
Enterprise is an association-in-fact enterprise within the meaning of 18 U.S.C §1961. Each Social

1 Media Defendant and their respective executives are associated with the Strategic Partnership  
2 Enterprise.

3 310. The Strategic Partnership Enterprise engages in and affects interstate and foreign  
4 commerce.

5 311. Each Social Media Defendant conducts and participates in the Strategic Partnership  
6 Enterprise's affairs through a pattern of racketeering activity, as defined in 18 U.S.C. §1961(5).  
7 Social Media Defendants' pattern of racketeering activity includes numerous violations of the  
8 federal wire fraud statute, 18 U.S.C. §1343.

9 312. Defendants formed a scheme to accomplish the purpose of maximizing youth  
10 engagement on their respective platforms by collectively gaslighting and defrauding the public  
11 into believing that its products, social media platforms, did not have detrimental effects on  
12 adolescents, in order to achieve the goal of collectively increasing advertising revenue by ensuring  
13 youth user engagement. The scheme was profitable, as evidenced by the Defendants' making  
14 nearly \$11 billion in advertising revenue from users under the age of 18 in 2022.

15 313. Defendants' scheme to defraud was and is intended to deceive the public, including  
16 the Choctaw Nation's youth and their guardians in order to maximize advertising revenues by  
17 means of materially false or fraudulent pretenses, representations, and promises regarding the  
18 safety of their respective platforms and business practices targeting young users.

19 314. The scheme involves materially false representations and deceptive omissions to  
20 the public about the known risks to youth users who engage on their platforms that Defendants  
21 had a duty to disclose, as well the deliberate suppression of internal research findings showing the  
22 harmful effects social media platforms have on young users, among other things.

23 315. Defendants' systematic and coordinated conduct in the development and operation  
24 of each social media platform is in violation of RICO, 18 U.S.C. §1962(c), has injured Plaintiff,  
25 thereby entitling Plaintiff to recover treble damages.

26 316. Defendants' intent to defraud is evidenced by their conduct. The written statements,  
27 marketing materials and statements made on behalf of the Defendants collectively contain  
28

1 numerous false representations and promises, and those falsehoods were and are capable of  
2 portraying social media platforms as harmless, which is demonstrably untrue.

3 317. The Social Media Defendants devised and knowingly carried out an illegal scheme  
4 and artifice to defraud by means of materially false or fraudulent pretenses and omissions of  
5 material facts regarding the safety risks of their social media platforms on young users. The Social  
6 Media Defendants, as members the Strategic Partnership Enterprise, knew that the weight of  
7 contemporaneous scientific evidence established the existence of the safety risk to young users  
8 and that the risk was material. They acted with reckless disregard in their statements to guardians,  
9 the Choctaw Nation's youth, and the public at large, wherein they omitted the material safety risks.  
10 The Social Media Defendants intended that that their common purpose and scheme to defraud  
11 would, and did, use the interstate wire facilities, intentionally and knowingly with the specific  
12 intent to advance, and for the purpose of executing, their illegal scheme.

13 318. The pattern of racketeering activity by the Social Media Defendants and the  
14 Strategic Partnership Enterprise involved numerous separate instances of the use of interstate wire  
15 facilities in furtherance of the unlawful Strategic Partnership Enterprise, including materially  
16 uniform concealments and material omissions in statements regarding the material safety risks of  
17 their social media platforms, with the goal of collectively profiting from increased advertising  
18 revenues due to maximizing the engagement from youth users, including the Choctaw Nation's  
19 youth members, induced by the public, including the Choctaw Nation's reliance on the Social  
20 Media Defendants omissions and misrepresentations.

21 319. Each of these fraudulent interstate wire transmissions constitutes racketeering  
22 activity and collectively, these violations constitute a pattern of racketeering activity, through  
23 which the Social Media Defendants defrauded and intended to defraud guardians and the Choctaw  
24 Nation's youth in order to maximize advertising revenues.

25 320. All of these wire communications were both foreseeable and incident to an essential  
26 part of Defendants' fraudulent scheme. Defendants' violations of RICO injured Plaintiff in their  
27 property by fraudulently inducing them to dedicate funding and resources that they are otherwise  
28

1 entitled to in order to address the mental health crisis plaguing its youth population as a result of  
2 Defendants' intentional and coordinated fraudulent efforts.

3 321. Defendants' violations of RICO are the but-for cause of Plaintiff's injuries. Defendants'  
4 violations also are the proximate cause of Plaintiff's injuries, as the Tribe's government would not  
5 have permitted the social media platforms to have been as widely used as they have been if  
6 Defendants not misrepresented and suppressed the known risks to a vulnerable youth population  
7 at the center of the Tribe's communities.

8  
9 **SECOND CLAIM FOR RELIEF**  
10 **Public Nuisance**  
11 **(Brought by Plaintiff Against All Defendants)**

12 322. The Choctaw Nation repeats and realleges ¶¶1-303, as if fully alleged herein.

13 323. Section 821B of the Restatement (Second) Torts defines a "public nuisance" as "an  
14 unreasonable interference with a right common to the general public."

15 324. Sections 821B(2)(a),(c) of the Restatement (Second) Torts provide that an  
16 unreasonable interference with a public right includes conduct that involves a "significant  
17 interference with the public health, the public safety, the public peace, and the public comfort" and  
18 conduct "of a continuing nature or has produced a permanent or long-lasting effect, and, as the  
19 actor knows or has reason to know, has a significant effect upon the public right."

20 325. The Choctaw Nation brings this claim to abate the public nuisance that has and is  
21 contemporaneously impacting the Choctaw Nation's communities, and that the Defendants are  
22 responsible for creating.

23 326. Each Defendant, acting individually and in concert, unlawfully committed an act  
24 or omitted to perform a duty by failing to use reasonable care in the design, promotion, and  
25 operation of their respective social media products.

26 327. Defendants' acts and omissions created and substantially contribute to the social  
27 media addiction epidemic and youth mental health crisis in the communities of the Choctaw  
28 Nation, unreasonably interfering with the public health and safety in Choctaw Nation's

1 communities and significantly interfering with the operations, resource allocation, and welfare of  
2 Choctaw Nation's communities.

3 328. Defendants' conduct affects every one of Choctaw Nation's Reservation  
4 communities, its programs and services, and every member within each community.

5 329. Defendants' conduct is of a continuing nature and has produced permanent and  
6 long-lasting damage and is likely to continue to cause significant harm to the health and welfare  
7 of the Choctaw Nation, its programs and services, and its members. Defendants know their conduct  
8 has a significant effect upon the public right that is substantial and unreasonable.

9 330. Defendants' conduct caused and continues to contribute to the aforementioned  
10 social media addiction epidemic and youth mental health crisis devastating the public health,  
11 safety, resources, and welfare of the Choctaw Nation. The Nation has already expended, and will  
12 need to continue to expend, substantial resources to mitigate the harm caused by Defendants'  
13 conduct. The resulting harm to the Choctaw Nation and its programs and services, members, and  
14 respective communities substantially outweighs any offsetting benefit.

15 331. Defendants have a duty to abate the nuisance they create, yet they have failed to  
16 fulfill this duty.

17 332. The public nuisance created, perpetuated, and maintained by Defendants can be  
18 abated and further recurrence of such harm and inconvenience can be abated.

19 333. The rights, interests, and inconvenience to the Choctaw Nation's communities far  
20 outweighs the rights, interests, and inconvenience to Defendants, who have profited tremendously  
21 from their wrongful conduct at the expense of the Choctaw Nation's most vulnerable members.

22 334. Defendants knew or reasonably should have known that their design, promotion,  
23 and operation of their social media products would cause Choctaw Nation youth to become  
24 addicted to their platforms, that their marketing methods were designed to addict youth, and that  
25 their persistent efforts to increase youth engagement with their products were causing harm to  
26 youth, including youth in Choctaw Nation's communities. The public nuisance caused by  
27 Defendants was reasonably foreseeable, including the financial and economic losses already  
28 incurred by Plaintiff.

1 335. Additionally, Defendants’ conduct was a substantial factor in bringing about the  
2 public nuisance. By designing, marketing, promoting, and operating their social media products in  
3 a manner intended to maximize the time youth spend on their respective platforms—despite  
4 knowledge of the harms to young users resulting from their wrongful conduct—Defendants  
5 directly facilitated the widespread, excessive, and addictive use of their social media products and  
6 the resulting public nuisance plaguing the Choctaw Nation’s youth.

7 336. By seeking to capitalize on their success by refining their social media products to  
8 increase the time youth spend on their platforms, Defendants directly caused this public nuisance  
9 plaguing the Choctaw Nation.

10 337. Defendants’ actions were, at the very least, a substantial factor in their respective  
11 social media products becoming widely available and widely used in the Choctaw Nation’s youth  
12 population.

13 338. Defendants’ actions were, at the very least, a substantial factor in the Choctaw  
14 Nation and its programs, services, and members’ inability to educate its members about the risks  
15 and benefits of youth users engaging with their social media products.

16 339. But for Defendants’ actions, the Choctaw Nation’s youth would not use Defendants’  
17 social media products as frequently or to the extent as they do today or be deluged with exploitive  
18 and harmful content to the same degree, and the epidemic and mental health crisis that currently  
19 exists because of Defendants’ conduct would have been averted.

20 340. The Choctaw Nation seeks an order providing for abatement of the public nuisance  
21 that Defendants created or assisted in the creation of, and enjoining Defendants from future  
22 conduct creating a public nuisance.

23 341. The Choctaw Nation seeks damages from the Defendants to pay for the costs to  
24 permanently eliminate the hazards to public health and safety and abate the public nuisance.

25 342. The Choctaw Nation has had to take steps to mitigate the harm and disruption  
26 caused by Defendants’ conduct.

27 343. Defendants’ conduct is especially injurious to Plaintiff because, as a direct and  
28 proximate cause of Defendants’ conduct creating or assisting in the creation of a public nuisance,

1 the Choctaw Nation and its programs, services, and members have sustained and will continue to  
2 sustain substantial injuries.

3 344. As a direct result of Defendants' conduct, the Choctaw Nation and its respective  
4 communities have suffered actual injury and economic damages including, but not limited to,  
5 significant expenses for enforcement, emergency response services, health, education and training,  
6 prosecution, child protection, corrections, judicial and other services.

7 345. Defendants are liable to the Choctaw Nation for the costs borne by the Nation as a  
8 result of the social media addiction epidemic and youth mental health crisis plaguing its  
9 communities and for the costs of abating the nuisance created by Defendants.

10 346. The Choctaw Nation requests all the relief to which it is entitled in their own right  
11 and relating to the special damage or injury it has suffered, including in its *parens patriae* capacity  
12 in the public interest to protect the health, safety, and welfare of all members of its respective  
13 communities. This includes actual and compensatory damages in an amount to be determined at  
14 trial and an order providing for the abatement of the public nuisance that Defendants have created  
15 or assisted in the creation of, and enjoining Defendants from future conduct contributing to the  
16 public nuisance described above. All Defendants are jointly and severally liable for the public  
17 nuisance.

18  
19 **THIRD CLAIM FOR RELIEF**  
20 **Fraud**  
21 **(Brought by Plaintiff Against All Defendants)**

22 347. The Choctaw Nation repeats and realleges ¶¶1-303, as if fully alleged herein.

23 348. As alleged herein and throughout this Complaint, Defendants have made material  
24 misrepresentations concerning the design, impacts, and/or operation of their social media products,  
25 as well as false or misleading descriptions, omissions, and representations of fact during the  
26 advertising and portrayal of their respective products, and those material misrepresentations and  
27 false or misleading descriptions, omissions, and representations of fact were knowingly or  
28 recklessly made.

1 349. Defendants made these material misrepresentations and false or misleading  
2 descriptions, omissions, and representations of fact in an intentional effort to deceive and induce  
3 The Choctaw Nation's youth community members to engage with and maximize time spent on  
4 their respective platforms, despite Defendants' knowledge that their social media products were  
5 harmful to youth users and that the their social media products were highly addictive and subjected  
6 youth users to exploitation and concerning content.

7 350. Defendants continued making these materials misrepresentations and omissions  
8 regarding their respective social media products, and failed to correct them, despite multiple  
9 regulatory settlements, publications, and investigations demonstrating the false nature of  
10 Defendants' claims and their devastating consequences.

11 351. Youth members, their guardians, and all other community members in the Choctaw  
12 Nation relied on the Defendants' misrepresentations and omissions in engaging with and  
13 permitting use of Defendants' social media products.

14 352. Defendants are liable to the Choctaw Nation for the damage Defendants' material,  
15 uncorrected, and knowingly or recklessly made misrepresentations, omissions, and false  
16 statements have caused to Plaintiff and its programs, services, and members.

17  
18 **FOURTH CLAIM FOR RELIEF**  
19 **Negligence and Gross Negligence**  
20 **(Brought by Plaintiff Against All Defendants)**

21 353. The Choctaw Nation repeats and realleges ¶¶1-303, as if fully alleged herein.

22 354. All Defendants had a legal duty to act with the exercise of ordinary care or skill to  
23 prevent injury to another.

24 355. Defendants owed the Choctaw Nation and its members a duty to not expose them  
25 to unreasonable risk of harm, and to act with reasonable care as a reasonably careful person and/or  
26 company would act under the circumstances.

27 356. At all times relevant to this litigation, Defendants owed a duty to the Choctaw  
28 Nation and its members to exercise reasonable care in the design, research, development, testing,  
marketing, supply, promotion, advertisement, operation, and distribution of their social media

1 products, including the duty to take all reasonable steps necessary to design, research, market,  
2 advertise, promote, operate, and/or distribute their platforms in a way that is not unreasonably  
3 dangerous to users, including vulnerable young users.

4 357. At all times relevant to this litigation, Defendants owed a duty to the Choctaw  
5 Nation and its members to exercise reasonable care in the design, research, development, testing,  
6 marketing, supply, promotion, advertisement, operation, and distribution of their social media  
7 products, including the duty to provide accurate, true, and correct information about the risks of  
8 using Defendants' platforms; and appropriate, complete, and accurate warnings about the potential  
9 adverse effects of extended social media use, particularly social media content Defendants directed  
10 via their algorithms to young users.

11 358. At all times relevant to this litigation, Defendants knew or, in the exercise of  
12 reasonable care, should have known of the hazards and dangers of their respective social media  
13 products and specifically, the health hazards their platforms posed to youth in particular, especially  
14 extended or problematic use of such products.

15 359. Accordingly, at all times relevant to this litigation, Defendants knew or, in the  
16 exercise of reasonable care, should have known that use of Defendants' social media products by  
17 the Choctaw Nation's youth members could cause the Choctaw Nation and its programs, services,  
18 and members' injuries and thus created a dangerous and unreasonable risk of injury to the Choctaw  
19 Nation and its programs, services, and members.

20 360. Defendants also knew or, in the exercise of reasonable care, should have known  
21 that users of Defendants' social media products were unaware of the risks and the magnitude of  
22 the risks associated with the use of Defendants' platforms including but not limited to the risks of  
23 extended or problematic social media use and the likelihood that algorithm-based  
24 recommendations would expose young users to content that is violent, sexual, or encouraging of  
25 self-harm, among other types of harmful content.

26 361. As such, Defendants, by action and inaction, representation and omission, breached  
27 their duty of reasonable care, failed to exercise ordinary care, and failed to act as a reasonably  
28 careful person and/or company would act under the circumstances in the design, research,

1 development, testing, marketing, supply, promotion, advertisement, operation, and distribution of  
2 their social media products, in that Defendants designed, researched, developed, tested, marketed,  
3 supplied, promoted, advertised, operated, and distributed social media platforms that Defendants  
4 knew or had reason to know would negatively impact the mental health of users, particularly youth,  
5 and failed to prevent or adequately warn of these risks and injuries.

6 362. Despite their ability and means to investigate, study, and test their social media  
7 products and to provide adequate warnings and safety controls, Defendants have failed to do so.  
8 Defendants have wrongfully concealed information and have made false and/or misleading  
9 statements concerning the safety and use of Defendants' social media products. Defendants  
10 breached their duty of care through their wrongful acts, including, but not limited to:

11 i. designing, researching, developing, marketing, supplying, promoting,  
12 advertising, operating, and distributing their social media platforms without thorough research  
13 testing;

14 ii. failing to sufficiently study and conduct necessary tests to determine  
15 whether or not their social media platforms were safe for youth users;

16 iii. failing to use reasonable and prudent care in the research, design,  
17 development, testing, marketing, supply, promotion, advertisement, operation, and distribution of  
18 their social media platforms so as to avoid the risk of encouraging extended and compulsive social  
19 media use;

20 iv. designing their social media platforms to maximize the amount of time users  
21 spend on the platform and causing excessive and problematic use of their platforms, particularly  
22 among youth, through the use of algorithm-based feeds;

23 v. failing to implement adequate safeguards in the design and operation of  
24 their platforms to ensure they would not encourage excessive and problematic use of their  
25 platforms;

26 vi. designing and manufacturing their platforms to appeal to minors and young  
27 people who lack the same cognitive development as adults and are particularly vulnerable to social  
28 rewards;

1           vii. failing to take adequate steps to prevent their platforms from being  
2 promoted, distributed, and used by minors under the age of 13;

3           viii. failing to provide adequate warnings to young users or parents/guardians  
4 who Defendants could reasonably foresee would use their platforms;

5           ix. failing to disclose to, or warn, the Choctaw Nation, users, and the general  
6 public of the negative mental health consequences associated with social media use, especially for  
7 children and adolescents;

8           x. failing to disclose to the Choctaw Nation, users, and the general public that  
9 Defendants' platforms are designed to maximize the time users, particularly youth, spend on  
10 Defendants' platforms and cause negative mental health consequences;

11           xi. representing that Defendants' platforms were safe for child and adolescent  
12 users when, in fact, Defendants knew or should have known that the platforms presented acute  
13 mental health concerns for young users;

14           xii. failing to alert users and the general public, including the Choctaw Nation's  
15 members, of the true risks of using Defendants' platforms;

16           xiii. advertising, marketing; and recommending Defendants' platforms while  
17 concealing and failing to disclose or warn of the dangers known by Defendants to be associated  
18 with, or caused by, youth use of Defendants' platforms;

19           xiv. continuing to design, research, develop, market, supply, promote, advertise,  
20 operate, and distribute Defendants' platforms with knowledge that Defendants' platforms are  
21 unreasonably unsafe, addictive, and dangerous to youth mental health;

22           xv. failing to modify Defendants' algorithms, which are used to recommend  
23 content to users, in a manner that would no longer prioritize maximizing the amount of time users  
24 spend on Defendants' platforms over the safety of its youth users;

25           xvi. failing to adequately modify Defendants' algorithm-based  
26 recommendations to filter out content that expose child and adolescent users to content that is  
27 violent, sexual, or encourages self-harm, among other types of harmful content, and

28           xvii. committing other failures, acts, and omissions set forth herein.

1           363. Defendants knew or should have known that it was foreseeable that Choctaw  
2 Nation and its programs, services, and members would suffer injuries as a result of Defendants'  
3 failure to exercise reasonable care in designing, researching, developing, testing, marketing,  
4 supplying, promoting, advertising, operating, and distributing Defendants' platforms, particularly  
5 when Defendants' platforms were designed, developed, operated and marketed to maximize the  
6 time youth spend on Defendants' platforms.

7           364. The Choctaw Nation and its programs, services, and members did not know and  
8 could not have known the nature and extent of the injuries that could result from the intended use  
9 of Defendants' social media platforms.

10           365. Defendants' negligence helped to and did produce, and was the proximate cause of,  
11 the injuries, harm, and losses that the Choctaw Nation and its programs, services, and members  
12 suffered and will continue to suffer, as detailed above. Such injuries, harm, and losses would not  
13 have happened without Defendants' negligence as described herein.

14           366. The social media addiction epidemic and youth mental health crisis caused and/or  
15 significantly contributed to by the Defendants has caused a major disruptive behavioral situation  
16 in the Choctaw Nation's communities and Plaintiff has had to take steps to mitigate the harm and  
17 disruption caused by Defendants' conduct.

18           367. Defendants' conduct was also grossly negligent because Defendants acted  
19 recklessly, willfully, and wantonly. Each Defendant knew of the substantial risk of harm that their  
20 platforms posed to users' mental health, particularly young users, yet engaged in that conduct  
21 anyway.

22           368. Defendants have acted with oppression, fraud, and malice, actual and presumed.

23           369. Defendants' conduct, as described above, was intended to serve their own interests  
24 despite having reason to know and consciously disregarding a substantial risk that their conduct  
25 might significantly injure the rights of others, including the Choctaw Nation and its programs,  
26 services, and members, and/or Defendants consciously pursued a course of conduct knowing that  
27 it created a substantial risk of significant harm to others, including Choctaw Nation and its  
28

1 programs, services, and members. Defendants regularly risk the health of youth users of their  
2 platforms with full knowledge of the significant dangers of their platforms.

3 370. Defendants consciously decided not to redesign, warn, or inform the unsuspecting  
4 public, including the Choctaw Nation or its members.

5 371. As a result of Defendants' negligence and gross negligence, the Choctaw Nation  
6 and its programs, services, and members suffered harm to their real and personal property along  
7 with other economic losses, including the costs associated with past, present, and future mitigation  
8 efforts to address, pay for and/or eliminate the social media addiction epidemic and youth mental  
9 health crisis plaguing their communities, in an amount to be proven at trial.

10 **FIFTH CLAIM FOR RELIEF**  
11 **Product Liability—Failure to Warn**  
12 **(Brought by Plaintiff Against All Defendants)**

13 372. The Choctaw Nation repeats and realleges ¶¶1-303, as if fully alleged herein.

14 373. Defendants engaged in the designing, developing, marketing, promoting,  
15 advertising, operating, of addictive and harmful social media products nationally and within the  
16 Choctaw Nation's communities.

17 374. Defendants' conduct created the social media addiction epidemic and youth mental  
18 health crisis plaguing the Choctaw Nation and its members.

19 375. Defendants knew or should have known that the social media products they  
20 designed and marketed would be used by vulnerable young users without supervision and that  
21 guardians, families, and the general public would rely on their marketing and product descriptions  
22 to understand the proper uses, risks, and benefits of their social media products.

23 376. Defendants had a duty to provide adequate warnings that clearly indicated the scope  
24 of the risk associated with the use of the social media products they designed and made available  
25 to young users.

26 377. As alleged herein and throughout this Complaint, rather than provide such adequate  
27 warnings, Defendants instead undertook a concerted and intentional effort to downplay the  
28 substantial risk of addiction, death, and/or other known negative outcomes associated with the use  
of their intentionally addictive products by their target market, young and vulnerable users.

1 378. Defendants' marketing efforts and false and misleading statements successfully  
2 convinced minors, guardians, families, and the general public that these risks were substantially  
3 lower than they actually were, and the social media products therefore failed to perform at the  
4 safety level expected by the consumers.

5 379. As a direct, legal, and proximate result of Defendants' failure to warn, and  
6 intentional misrepresentations of, the grave and substantial risks associated with the use of their  
7 social media products, the Choctaw Nation has suffered and continues to suffer damages, both  
8 economic and to the health and welfare of the Choctaw Nation and its members.

9 **SIXTH CLAIM FOR RELIEF**  
10 **Unjust Enrichment**  
11 **(Brought by Plaintiff Against All Defendants)**

12 380. The Choctaw Nation repeats and realleges ¶¶1-303, as if fully alleged herein.

13 381. As an expected and intended result of their conscious wrongdoing as set forth in  
14 this Complaint, Defendants have profited and benefited from the vast number young users  
15 engaging with and compulsively using their intentionally addictive social media products within  
16 the Choctaw Nation's communities.

17 382. The data that young people of the Choctaw Nation provide to Defendants has value,  
18 which Defendants have exploited for profit.

19 383. The Choctaw Nation has expended substantial amounts of money and resources to  
20 remedy and mitigate the societal harm plaguing its communities caused by Defendants' conduct.

21 384. The Choctaw Nation needs more resources to hire counselors and medical  
22 professionals, create mental health programs, train leaders to recognize distress, educate about the  
23 harm caused by Defendants' actions, and teach youth about the risks of Defendants' Social Media  
24 Platforms.

25 385. The Choctaw Nation incurs significant expenses to provide necessary, enhanced  
26 and expanded resources, and specialized healthcare services, to support youth members struggling  
27 with social media addiction and the resulting mental health crisis caused by Defendants' products.  
28 These expenditures have, in turn, contributed to the enrichment of the Defendants. The  
expenditures by the Choctaw Nation have helped sustain Defendants' businesses.

1 386. The Choctaw Nation has conferred a benefit upon Defendants, by paying for what  
2 should be the Defendants' externalities—the costs of the harm caused by Defendants' negligent or  
3 otherwise unlawful distribution and operation of their social media products.

4 387. Defendants are aware of this obvious benefit, and that retention of this benefit is  
5 unjust.

6 388. The Choctaw Nation has paid for the cost of Defendants' externalities and  
7 Defendants have benefitted from those payments because they allowed them to continue to market,  
8 develop, and optimize their social media platforms and continue to target and exploit vulnerable  
9 young users with their addictive and harmful products. Because of their deceptive marketing and  
10 design of their social media products, Defendants obtained enrichment they would not otherwise  
11 have obtained. The enrichment was without justification and the Choctaw Nation lacks a remedy  
12 provided by law.

13 389. Defendants made substantial profits while fueling the social media addiction  
14 epidemic and youth mental health crisis plaguing the Choctaw Nation.

15 390. Defendants continue to receive considerable profits from the engagement of  
16 vulnerable and addicted users within the Choctaw Nation's youth population.

17 391. Defendants have been unjustly enriched by their negligent, intentional, malicious,  
18 oppressive, illegal and unethical acts, omissions, and wrongdoing.

19 392. It would be inequitable to allow Defendants to retain such benefits or financial  
20 advantage.

21 393. Defendants' misconduct alleged in herein is ongoing and persistent.

22 394. The Choctaw Nation demands judgment against each Defendant for restitution,  
23 disgorgement, and any other relief allowed in law or equity.

24 **IX. REQUEST FOR RELIEF**

25 Plaintiff demands judgment against each of the Defendants to the full extent of the law,  
26 including but not limited to:

- 27 A. Entering an Order that the conduct alleged herein constitutes a public nuisance;  
28 B. Entering an Order that Defendants are jointly and severally liable;

- 1 C. Entering an Order requiring Defendants to abate the public nuisance described herein
- 2 and to deter and/or prevent the resumption of such nuisance;
- 3 D. Enjoining Defendants from engaging in further actions causing or contributing to the
- 4 public nuisance as described herein;
- 5 E. Awarding Plaintiff restitution of the costs incurred as a result of Defendants' unjust
- 6 enrichment and disgorgement of all amounts Defendants obtained from their unjust
- 7 enrichment;
- 8 F. Awarding equitable relief to fund prevention education and treatment for excessive and
- 9 problematic use of social media;
- 10 G. Entering judgment against Defendants in an amount equal to three times the amount of
- 11 damages to Plaintiff's property by reason of Defendants' violation of 18 U.S.C.
- 12 §1962(c);
- 13 H. Awarding actual, compensatory, and punitive damages;
- 14 I. Awarding reasonable attorneys' fees and costs of suit;
- 15 J. Awarding pre-judgment and post-judgment interest; and
- 16 K. Such other and further relief as the Court deems just and proper under the
- 17 circumstances.

18 **X. TRIAL BY JURY**

19 The Choctaw Nation hereby demands a trial by jury for all claims so triable.

20 DATED: September 15, 2025

*Counsel for Plaintiff  
The Choctaw Nation*

CIVIL COVER SHEET for people without lawyers only

See Civil Local Rule 3-2 (amended April 28, 2025), which requires the filing of a civil cover sheet only by those unrepresented by counsel.

I. PLAINTIFF(S)

THE CHOCTAW NATION OF OKLAHOMA

County of Residence of First Listed Plaintiff: Bryan County, OK

Attorney or Pro Se Litigant Information (Firm Name, Address, and Telephone Number) Brian O. O'Mara, DICELLO LEVITT LLP, 4747 Executive Dr., Suite 240, San Diego, CA 92121, Telephone: 619-923-3939

DEFENDANT(S)

Meta Platforms, Inc. F/K/A Facebook, Inc.; Facebook Payments Inc.; Sculus, Inc.; Facebook Operations, LLC; Instagram, LLC; Snap, Inc.; TikTok Inc. F/K/A Musical.ly, Inc.; ByteDance Inc.; ByteDance Ltd.; TikTok Ltd.; TikTok LLC; TikTok U.S. Data Security Inc.; Google LLC; YouTube, LLC; Alphabet Inc.

County of Residence of First Listed Defendant: San Mateo County

Defendant's Attorney's Name and Contact Information (if known)

II. BASIS OF JURISDICTION (Place an "X" in One Box Only)

- U.S. Government Plaintiff, Federal Question (U.S. Government Not a Party), U.S. Government Defendant, Diversity

III. CAUSE OF ACTION

Cite the U.S. Statute under which you are filing: (Use jurisdictional statutes only for diversity)

18 U.S.C. §§1961, et seq.

Brief description of case: Failure to warn and intentional misrepresentations of the risks associated with the use of social media products.

IV. NATURE OF SUIT (Place an "X" in One Box Only)

Table with 5 columns: CONTRACT, REAL PROPERTY, TORTS, FORFEITURE/PENALTY, LABOR, IMMIGRATION, BANKRUPTCY, SOCIAL SECURITY, FEDERAL TAX SUITS, OTHER STATUTES. Includes various legal categories like Personal Injury, Labor, and Social Security.

V. ORIGIN (Place an "X" in One Box Only)

- Original Proceeding, Removed from State Court, Remanded from Appellate Court, Reinstated or Reopened, Transferred from Another District, Multidistrict Litigation--Transfer, Multidistrict Litigation--Direct File

VI. FOR DIVERSITY CASES ONLY: CITIZENSHIP OF PRINCIPAL PARTIES

(Place an "X" in One Box for Plaintiff and One Box for Defendant)

Table for citizenship information with columns for Plaintiff and Defendant, and rows for Citizen of California, Citizen of Another State, Citizen or Subject of a Foreign Country, Incorporated or Principal Place of Business In California, Incorporated and Principal Place of Business In Another State, Foreign Nation.

VII. REQUESTED IN COMPLAINT

- Check if the complaint contains a jury demand. Check if the complaint contains a monetary demand. Amount: Check if the complaint seeks class action status under Fed. R. Civ. P. 23. Check if the complaint seeks a nationwide injunction or Administrative Procedure Act vacatur.

VIII. RELATED CASE(S) OR MDL CASE

Provide case name(s), number(s), and presiding judge(s). MDL No. 3047, 4:22-MD-03047, Hon. Yvonne Gonzalez Rogers; The White Mountain Apache Tribe v. Meta Platforms, Inc. et al, 4:25-cv-00249-YGR

IX. DIVISIONAL ASSIGNMENT pursuant to Civil Local Rule 3-2

(Place an "X" in One Box Only) SAN FRANCISCO/OAKLAND SAN JOSE EUREKA-MCKINLEYVILLE

DATE 09/15/2025

SIGNATURE OF ATTORNEY OR PRO SE LITIGANT s/ Brian O. O'Mara

## COMPLETING THE CIVIL COVER SHEET

Complete the form as follows:

- I. Plaintiffs-Defendants.** Enter names (last, first, middle initial) of plaintiff and defendant. If the plaintiff or defendant is a government agency, use the full name or standard abbreviations. If the plaintiff or defendant is an official within a government agency, identify first the agency and then the official, giving both name and title.
- County of Residence.** For each civil case filed, except U.S. plaintiff cases, enter the name of the county where the first listed plaintiff resides at the time of filing. In U.S. plaintiff cases, enter the name of the county in which the first listed defendant resides at the time of filing. In land condemnation cases, the county of residence of the “defendant” is the location of the tract of land involved.
- Attorney/Pro Se Litigant Information.** Enter the firm name, address, telephone number, and email for attorney of record or pro se litigant. If there are several individuals, list them on an attachment.
- II. Jurisdiction.** Under Federal Rule of Civil Procedure 8(a), pleadings must establish the basis of jurisdiction. If multiple bases for jurisdiction apply, prioritize them in the order listed:
- (1) *United States plaintiff.* Jurisdiction based on 28 U.S.C. §§ 1345 and 1348 for suits filed by the United States, its agencies or officers.
  - (2) *United States defendant.* Applies when the United States, its agencies, or officers are defendants.
  - (3) *Federal question.* Select this option when jurisdiction is based on 28 U.S.C. § 1331 for cases involving the U.S. Constitution, its amendments, federal laws, or treaties (but use choices 1 or 2 if the United States is a party).
  - (4) *Diversity of citizenship.* Select this option when jurisdiction is based on 28 U.S.C. § 1332 for cases between citizens of different states and complete Section VI to specify the parties’ citizenship. Note: Federal question jurisdiction takes precedence over diversity jurisdiction.
- III. Cause of Action.** Enter the statute directly related to the cause of action and give a brief description of the cause. Do not cite jurisdictional statutes unless jurisdiction is based on diversity. Example: U.S. Civil Statute: 47 U.S.C. § 553. Brief Description: Unauthorized reception of cable service.
- IV. Nature of Suit.** Check one of the boxes. If the case fits more than one nature of suit, select the most definitive or predominant.
- V. Origin.** Check one of the boxes:
- (1) *Original Proceedings.* Cases originating in the United States district courts.
  - (2) *Removed from State Court.* Proceedings initiated in state courts may be removed to the district courts under Title 28 U.S.C. § 1441. When the petition for removal is granted, check this box.
  - (3) *Remanded from Appellate Court.* Check this box for cases remanded to the district court for further action, using the date of remand as the filing date.
  - (4) *Reinstated or Reopened.* Check this box for cases reinstated or reopened in the district court. Use the reopening date as the filing date.
  - (5) *Transferred from Another District.* Check this box for cases transferred under Title 28 U.S.C. § 1404(a). Do not use this for within-district transfers or multidistrict litigation (MDL) transfers.
  - (6) *Multidistrict Litigation Transfer.* Check this box when a multidistrict (MDL) case is transferred into the district under authority of Title 28 U.S.C. § 1407.
  - (7) *Multidistrict Litigation Direct File.* Check this box when a multidistrict litigation case is filed in the same district as the Master MDL docket.
- VI. Residence (citizenship) of Principal Parties.** Mark for each principal party *only* if jurisdiction is based on diversity of citizenship.
- VII. Requested in Complaint.**
- (1) *Jury demand.* Check this box if plaintiff’s complaint demanded a jury trial.
  - (2) *Monetary demand.* For cases demanding monetary relief, check this box and enter the actual dollar amount being demanded.
  - (3) *Class action.* Check this box if plaintiff is filing a class action under Federal Rule of Civil Procedure 23.
  - (4) *Nationwide injunction.* Check this box if plaintiff is seeking a nationwide injunction or nationwide vacatur pursuant to the Administrative Procedures Act.
- VIII. Related Cases.** If there are related pending case(s), provide the case name(s) and number(s) and the name(s) of the presiding judge(s). If a short-form MDL complaint is being filed, furnish the MDL case name and number.
- IX. Divisional Assignment.** Identify the divisional venue according to Civil Local Rule 3-2: “the county in which a substantial part of the events or omissions which give rise to the claim occurred or in which a substantial part of the property that is the subject of the action is situated.” Note that case assignment is made without regard for division in the following case types: Property Rights (Patent, Trademark and Copyright), Prisoner Petitions, Securities Class Actions, Anti-Trust, Bankruptcy, Social Security, and Tax.
